Global Navigation Satellite Systems Basudeb Bhatta, 2021-05-09 Global Navigation Satellite Systems GNSS and their associated technologies have advanced by leaps and bounds in the nine years since the first edition of this book was published The concept of survey has changed especially in the disciplines of geomatics and geoinformatics This revised and updated second edition provides a

thorough understanding of the basic principles and techniques of GNSS analyzes all four active systems and explains clearly how each of these systems works Because of its straightforward treatment of the subject readers will gain an insight into the techniques trends and applications of GNSS and develop knowledge on selecting an appropriate GNSS instrument Written for students and practitioners in geoinformatics geomatics engineering surveying and remote sensing and GIS this introductory and practical book includes questions and exercises in each chapter Key Features Furnishes detailed information on GPS GLONASS Galileo BeiDou and other regional and augmented systems Provides practical guidance for surveying mapping and navigation with GNSS Sheds light on the latest developments and modern trends of GNSS Includes a detailed glossary of related terms Contains many illustrations that complement the text Exercises for each chapter MCQ solution manual for mathematical problems and PPT as online resources

Remote Sensing Handbook, Volume II Prasad S. Thenkabail, 2024-11-29 Volume II of the Six Volume Remote Sensing Handbook Second Edition is focused on digital image processing including image classification methods in land cover and land use It discusses object based segmentation and pixel based image processing algorithms change detection techniques and image classification for a wide array of applications including land use land cover croplands urban studies processing hyperspectral remote sensing data thermal imagery light detection and ranging LiDAR geoprocessing workflows frontiers of GIScience and future pathways This thoroughly revised and updated volume draws on the expertise of a diverse array of leading international authorities in remote sensing and provides an essential resource for researchers at all levels interested in using remote sensing It integrates discussions of remote sensing principles data methods development applications and scientific and social context Features Provides the most up to date comprehensive coverage of digital image processing Highlights object based image analysis OBIA and pixel based classification methods and techniques of digital image processing Demonstrates practical examples of image processing for a myriad of applications such as land use land cover croplands and urban Establishes image processing using different types of remote sensing data that includes multispectral radar LiDAR thermal and hyperspectral Highlights change detection geoprocessing and GIScience This volume is an excellent resource for the entire remote sensing and GIS community Academics researchers undergraduate and graduate students as well as practitioners decision makers and policymakers will benefit from the expertise of the professionals featured in this book and their extensive knowledge of new and emerging trends

Trends in Neuroergonomics: A Comprehensive Overview Klaus Gramann, Stephen H. Fairclough, Thorsten O. Zander, Hasan Ayaz, 2017-07-04 This Research Topic is dedicated to Raja Parasuraman who unexpectedly passed on March 22nd 2015 Raja Parasuraman's pioneering work led the emergence of Neuroergonomics as a new scientific field He combined his research interests in the field of Neuroergonomics which he defined as the study of the human brain in relation to performance at work and everyday settings Raja Parasuraman was a pioneer a truly exceptional researcher and an extraordinary person He made significant contributions to a number of

disciplines from human factors to cognitive neuroscience His advice to young researchers was to be passionate in order to develop theory and knowledge that can guide the design of technologies and environments for people His legacy the field of Neuroergonomics will live on in countless faculties and students whom he advised and inspired with unmatched humility throughout the whole of his distinguished career Raja Parasuraman was an impressive human being a very kind person and an absolutely inspiring individual who will be remembered by everyone who had the chance to meet him About this Research Topic Since the advent of neuroergonomics significant progress has been made with respect to methodology and tools for the investigation of the brain and behavior at work This is especially the case for neuroscientific methods where the availability of ambulatory hardware wearable sensors and advanced data analyses allow for imaging of brain dynamics in humans in applied environments Methods such as electroencephalography EEG functional near infrared spectroscopy fNIRS and stimulation approaches like transcranial direct current stimulation tDCS have made significant progress in both recording and altering brain activity while allowing full body movements outside laboratory environments For neuroergonomics the application of brain imaging in real world scenarios is highly relevant Traditionally brain imaging experiments in human factors research tend to avoid active behavior for fear of artifacts and a contaminated data set that would provide limited insight into brain dynamics in real working environments To overcome these problems new analyses approaches have to be developed that identify artifacts resulting from hostile recording environments and movement related non brain activity stemming from eye head and full body movements The application of methodology from the field of Brain Computer Interfacing BCI for neuroergonomics is one approach that has significant potential to enhance ambulatory monitoring and applied testing Passive BCIs allow for assessing aspects of the user state online such that systems can automatically adapt to their user This neuroadaptive technology could lead to highly efficient working environments to auto adaptive experimental paradigms and to a continuous tracking of cognitive and affective aspects of the user state Hence deployment of portable neuroimaging technologies to real time settings could help assess cognitive and motivational states of personnel assigned to perform critical tasks This Research Topic gathers submissions that cover new approaches in neuroergonomics Different article type cover advanced neuroscience methods and neuroergonomics techniques as well as analysis approaches to investigate brain dynamics in working environments The selection of papers provides insights into new neuroergonomic research approaches that demonstrate significant advances in brain imaging technologies that become more and more mobile Moreover a strong trend for new analyses approaches and paradigms investigating real work settings can be seen Together this unique collection of latest research papers provides a comprehensive overview on the latest developments in neuroergonomics

Learning Mobile App Development Jakob Iversen, Michael Eierman, 2014 This book is unique in two ways First it is specifically designed to meet the needs of students in a classroom setting making it ideal for use in college technical and advanced high school computer science programs that are rapidly incorporating mobile development into their

curricula Second it offers insightful parallel coverage of both iOS and Android helping students achieve mastery of either or both platforms as they gain a deeper comparative understanding of mobile development Students are guided through developing an actual working app on both platforms they learn about the entire mobile app development lifecycle including issues associated with licensing and both public and enterprise distribution This guide s tutorials have been extensively tested in developer training courses and are designed to support individuals coming to mobile development with widely varying backgrounds For those new to iOS the authors also provide an introduction to Objective C the iOS platform s native language

Advances in Information and Communication Kohei Arai,2021-04-12 This book aims to provide an international forum for scholarly researchers practitioners and academic communities to explore the role of information and communication technologies and its applications in technical and scholarly development The conference attracted a total of 464 submissions of which 152 submissions including 4 poster papers have been selected after a double blind review process Academic pioneering researchers scientists industrial engineers and students will find this series useful to gain insight into the current research and next generation information science and communication technologies This book discusses the aspects of communication data science ambient intelligence networking computing security and Internet of things from classical to intelligent scope The authors hope that readers find the volume interesting and valuable it gathers chapters addressing state of the art intelligent methods and techniques for solving real world problems along with a vision of the future research

Advances in Digital Forensics VII Gilbert Peterson,Sujeet Shenoj,2011-10-02 Digital forensics deals with the acquisition preservation examination analysis and presentation of electronic evidence Networked computing wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations Practically every crime now involves some aspect of digital evidence digital forensics provides the techniques and tools to articulate this evidence Digital forensics also has myriad intelligence applications Furthermore it has a vital role in information assurance investigations of security breaches yield valuable information that can be used to design more secure systems Advances in Digital Forensics VII describes original research results and innovative applications in the discipline of digital forensics In addition it highlights some of the major technical and legal issues related to digital evidence and electronic crime investigations The areas of coverage include Themes and Issues Forensic Techniques Fraud and Malware Investigations Network Forensics and Advanced Forensic Techniques This book is the 7th volume in the annual series produced by the International Federation for Information Processing IFIP Working Group 11 9 on Digital Forensics an international community of scientists engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics The book contains a selection of 21 edited papers from the 7th Annual IFIP WG 11 9 International Conference on Digital Forensics held at the National Center for Forensic Science Orlando Florida USA in the spring of 2011 Advances in Digital Forensics VII is an important resource for researchers faculty members and graduate students as well as

for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities Gilbert Peterson is an Associate Professor of Computer Engineering at the Air Force Institute of Technology Wright Patterson Air Force Base Ohio USA Sujeet Sheno is the F P Walter Professor of Computer Science at the University of Tulsa Tulsa Oklahoma USA
