PLAYING There will be no better moment Order your book now and start to play the piano **Bits and Pieces** Kenneth B. McAlpine, 2019 Bits and Pieces tells the story of chiptune a style of lo fi electronic music that emerged from the first generation of video game consoles and home computers in the late 1970s and early 1980s Through ingenuity and invention musicians and programmers developed code that enabled the limited hardware of those early 8 bit machines to perform musical feats that they were never designed to achieve In time that combination of hardware and creative code came to define a unique 8 bit sound that imprinted itself on a generation of gamers For a new generation of musicians this music has currency through the chipscene a vibrant musical subculture that repurposes obsolete gaming hardware It s performative

raw and edgy loaded with authenticity and driven by a strong DIY ethic It s more punk than Pac Man and yet it s part of that same story of ingenuity and invention 8 bit hardware is no longer a retired gaming console but a quirky and characterful musical instrument Taking these consoles to the stage musicians fuse 8 bit sounds with other musical styles drum n bass jungle techno and house to create a unique contemporary sound Analyzing musical structures and technological methods used with chiptune Bits and Pieces traces the simple beeps of the earliest arcade games through the murky shadows of the digital underground to global festivals and movie soundtracks

speculation Erick Verran s approach to philosophical inquiry follows the brute force literary technique of Jacques Derrida to exhaustively favor the material grammar of a signifier over hand me down meaning juxtaposing outer semblances with their buried systems and our etched in stone intuitions about color and illusion shape and value with lessons stolen from seemingly unrelatable disciplines Interlarded with extracts of Ludwig Wittgenstein but also Wallace Stevens Cormac McCarthy as well as Roland Barthes this cache of incidental remarks eschews what s granular for the biggest picture available leaving below the hyper specialized fields of academia for a bird s eye view of their crop circles Obiter Dicta is an unapologetic experiment in intellectual dot connecting that challenges much long standing wisdom about everything from illuminated manuscripts to Minecraft and the evolution of European music with lyrical brevity that is before jumping to the next topic **The**
