**The Attacking Ocean** Brian Fagan, 2013-06-11 The past fifteen thousand years the entire span of human civilization have witnessed dramatic sea level changes which began with rapid global warming at the end of the Ice Age when coastlines were more than seven hundred feet below modern levels Over the next ten millennia the oceans climbed in fits and starts These rapid changes had little effect on those humans who experienced them partly because there were so few people on earth and also because those people were able to adjust readily to new coastlines Global sea levels stabilized about six

thousand years ago except for local adjustments that caused often significant changes to places such as the Nile Delta The curve of inexorably rising seas flattened out as urban civilizations developed in Egypt Mesopotamia and South Asia The earth's population boomed quintupling from the time of Christ to the Industrial Revolution The threat from the oceans increased with our crowding along shores to live fish and trade Since 1860 the world has warmed significantly and the ocean's climb has accelerated The sea level changes are cumulative and gradual no one knows when they will end The Attacking Ocean from celebrated author Brian Fagan tells a tale of the rising complexity of the relationship between humans and the sea at their doorsteps a complexity created not by the oceans which have changed little What has changed is us and the number of us on earth

difficult to fully comprehend The international debate over nuclear fallout turned global radioactive contamination into an environmental issue eventually leading the nuclear superpowers to sign the landmark Partial Test Ban Treaty PTBT in 1963 Bringing together environmental history and Cold War history Toshihiro Higuchi argues that the PTBT originally proposed as an arms control measure transformed into a dual purpose initiative to check the nuclear arms race and radioactive pollution simultaneously Higuchi draws on sources in English Russian and Japanese considering both the epistemic differences that emerged in different scientific communities in the 1950s and the way that public consciousness around the risks of radioactive fallout influenced policy in turn Political Fallout addresses the implications of science and policymaking in the Anthropocene an era in which humans are confronting environmental changes of their own making **More Book Lust**

Hornfischer, 2009-03-25 NEW YORK TIMES BESTSELLER Son we're going to Hell The navigator of the USS Houston confided these prophetic words to a young officer as he and his captain charted a course into U.S. naval legend Renowned as FDR's favorite warship the cruiser USS Houston was a prize target trapped in the far Pacific after Pearl Harbor Without hope of reinforcement her crew faced a superior Japanese force ruthlessly committed to total conquest It wasn't a fair fight but the men of the Houston would wage it to the death Hornfischer brings to life the awesome terror of nighttime naval battles that turned decks into strobe lit slaughterhouses the deadly rain of fire from Japanese bombers and the almost superhuman effort of the crew as they miraculously escaped disaster again and again until their luck ran out during a daring action in Sunda Strait There hopelessly outnumbered the Houston was finally sunk and its survivors taken prisoner For more than three years their fate would be a mystery to families waiting at home In the brutal privation of jungle POW camps dubiously immortalized in such films as *The Bridge on the River Kwai* the war continued for the men of the Houston a life and death struggle to survive forced labor starvation disease and psychological torture Here is the gritty unvarnished story of the infamous Burma Thailand Death Railway glamorized by Hollywood but which in reality mercilessly reduced men to little more than animals who fought back against their dehumanization with dignity ingenuity sabotage will power and the undying faith that their country would prevail Using journals and letters rare historical documents including testimony from postwar Japanese war crimes tribunals and the eyewitness accounts of Houston's survivors James Hornfischer has crafted an account of human valor so riveting and awe inspiring it's easy to forget that every single word is true **BONUS** This edition contains an excerpt from James D.
