International Economics Paul R. Krugman, Maurice Obstfeld, Marc J. Melitz, 2018 Revised edition of the authors International economics 2015 **Lecture Notes In International Trade: An Undergraduate Course** Priyaranjan Jha, 2020-09-21 This book provides a comprehensive discussion of the economics of International Trade Key questions related to why countries trade how they gain from trade and how international trade can produce winners and losers are answered The last of these questions is related to the connection of trade to inequality in the distribution of income The book uses both theoretical models and empirical evidence to answer these questions It also provides a discussion of the economics of labor

migration and international capital mobility The book also provides a detailed discussion of the welfare implications of various trade policy instruments such as tariffs quotas export subsidies etc This is followed by a discussion of the process of actual policymaking in democratic societies which goes into the realm of political economy The focus here is on the political economy of trade policy It also provides a discussion of the economics of preferential trading agreements and a history of multilateral trading agreements under the aegis of GATT General Agreement on Tariffs and Trade and its evolution into the World Trade Organization WTO *International Economics: Theory And Policy, 8/E* Paul R. Krugman, 2008-09

International Economics Paul R. Krugman, Maurice Obstfeld, 1997 Focusing on international economics this work provides an analytical framework for understanding the international economy The first half of the text deals with trade the second half with the monetary aspect of international economics Each half starts with a step by step formulation of the analytical model followed by applications chapters where the model is applied to issues and policy questions

International Economic Policy for the Polycrisis Konrad Raczkowski, Piotr Komorowski, 2024-09-17 The struggle for world leadership between China and the United States resulting in Russia's war with Ukraine among other things underscores the reality of structural changes in the global economy and the global system This book explains that a new era of egocentrism and polycrisis in a multipolar system has emerged in international economic policy with a strong drive toward interventionism and protectionism of national economies Dynamic economic imbalances are becoming a constant factor in disrupting international competitiveness and forcing changes in both monetary policy and general economic policy This prompts a new more pragmatic definition of fundamental concepts in the theoretical sphere as well as an up to date and viable cause and effect narrative that is not disconnected from decision making processes in the economic and political spheres This book provides a comprehensive diagnosis of the current global economy landscape and evaluates the processes affecting the economic and financial realities and the effectiveness of economic policies The recent dynamics have rendered much of the existing literature outdated or confined to individual economies economic systems and regions The book describes the evolution of international economic policy offering a comparative analysis of foreign trade theories especially in the context of macroeconomic trends and the impact of international trade in goods and services in the new balance of power of the global economy Targeted primarily at academics students and researchers in economics finance international relations and management it will also serve as a valuable resource for policymakers shaping and implementing contemporary state economic policies
