The Korean Economy in Congressional Perspective John M. Starrels,1986 **The Korean Economy in Congressional Perspective** John M. Starrels,1986 **The Strategy for Korea's Economic Success** Hwy-Chang Moon,2016-04-01 Korea s economic success has inspired numerous studies and research projects in past decades Despite good efforts to analyze the strategy of Korea earlier studies have not been able to comprehensively and systematically explain the country s miraculous growth After thorough analysis of these earlier studies a new model has been developed by showing that a country or firm does not have to be more innovative or possess more resources to have a competitive advantage over others In *The Strategy for Korea s Economic Success* Hwy Chang Moon details four factors that comprise the ABCD model and illustrates how the Korean government corporations and people have exemplified these factors in achieving their current level of success The four factors are agility speed precision benchmarking learning best practices convergence mixing synergy and dedication diligence goal orientation Together these factors have enabled Korea s economic success and will continue to drive the next level of growth Anyone can become more competitive with proper implementation of the ABCDs Korea s development strategy holds special value because it is more practical and appropriate for many developing countries For more developed countries on the other hand the ABCDs can be used to fast track the next phase of growth Moon also highlights the role of internationalization in broadening the scope of strategic choices and shows how the combined implementation of internationalization and the ABCDs deepens the pool of strategic resources **Monthly Catalog of United States Government Publications** United States. History of North Korea Daniel Schwekendiek,2014-01-10 Even as its rise as a nuclear power unfolds on the nightly news North Korea remains arguably the most mysterious country in the world A virtual blackout of statistical information coming from the reclusive regime has shrouded the day to day lives of its inhabitants in secrecy This groundbreaking study which relies on rare U N assisted household data and carefully scrutinized propaganda materials offers the first comprehensive examination of the social and economic history of North Korea from its founding in 1948 to the present day Included are a chronicle of the political formation of the two Koreas an exploration of the social aspects of life in North Korea a discussion of the country s economic structure and development and cutting edge anthropometric analysis that reveals how life in seclusion has affected the physical development of North Koreans A concluding socioeconomic forecast predicts what lies ahead for the hermit kingdom Instructors considering this book for use in a course may request an examination copy here

The Global Financial Crisis and the Korean Economy Jang-Sup Shin,2013-12-04 The world economy fell into a global financial crisis in 2008 9 and is still jittered by its aftershocks Like other financial crises happened in the world economy it came as a surprise In historical perspective financial crises should be understood as a natural fact of life in the world economy and a more pertinent question that should be posed would be why people so easily forget and do not learn from the historical experience This book deals with the question in two ways First it investigates the frame of mind that distances people from the reality of life At the heart of it it argues that there are wrong perceptions on the working of the world economy in particular the international financial market It summarizes them as the five conventional wisdoms in the international financial market and by critically examining them it draws on the five financial theorems which would provide intellectual pillars for a more realistic understanding of the global financial market Second the book examines in detail the case of an emerging market economy that fell into a financial crisis twice in the recent decade South Korea provides us with an interesting case of emerging market financial crises that came as surprises it faced a financial crisis in 1997 98 after it had been acclaimed as one of East Asian miracle economies and it was again befallen to a crisis during the global financial crisis in 2008 2009 after it was widely regarded as a country that had recovered from the crisis with one of the most successful implementations of the IMF sponsored reforms The book attempts to provide the readers with a realistic understanding of emerging market financial crises by interpreting the recent global financial crisis and the Korean crises with some general concepts manifested in the five financial theorems It also tries to draw more general implications for policy management of emerging market economies *United States Engagement in the Asia Pacific: Perspectives from Asia* Yoichiro Sato,See Seng Tan,2015-07-15 This study brings together Asian and Asia based experts of international relations and U S foreign policy to present diverse Asian views about preferred modes of U S engagement in the region and compare

their views with U S interests in the region a prerequisite exercise to truly multilateral regional security governance With the rise of Chinese power in absolute and relative terms over the next decades as a key driving factor of the international relations in the Asia Pacific the United States has announced its Rebalance to Asia previously referred as Pivot to Asia strategy Asian responses perceptions and even interpretations of the U S strategy have been diverse Misconceptions of the U S strategy can be attributed to the built in contradictions among its objectives deliberate ambiguities left by the architects of the strategy mismatch between the stated strategy and actual policy implementations during the last three years and subjective reading by the Asian countries through the lens of their own interests This book will illuminate the diversity of Asian responses and perceptions and analyze the underlying reasons of the diversity The overarching framework of analysis for this book is the very dilemma of alliances abandonment and entrapment which hedging aims at evading Abandonment fear is primarily of the junior partner of an alliance that its senior partner may not come to its aid in crisis Meanwhile entrapment fear works both ways The United States may drag its allies into its conflict against a third party but U S allies may also drag the United States into their regional conflicts in which the United States has no direct or significant stake The Asian choices of their strategic responses to the U S Rebalancing will be described and analyzed through the lens of the perceived balance between the abandonment and entrapment fears as well as other historical and domestic factors unique to each Asian country The reading of the U S strategy by Asian countries is a subjective matter and their interests likely influence their analysis and consequently strategies It is not the aim of this volume to establish well defined cause and effect chain between the U S strategy and Asian strategies but thick descriptions have enabled some chapter authors to identify reciprocal relations between the two While China s growth is the most important driver of the changing strategic landscape in the Asia Pacific and the new U S strategy the new U S strategy inevitably influence the Chinese strategy which in turn triggers a chain reaction of strategic revisions in Asian countries This book is essential reading for scholars in Asian politics U S foreign policy international relations as well as for policy makers
