**Beyond Budgeting** Jeremy Hope, Robin Fraser, 2003 The annual budgeting process is a trap Pressured by fixed targets and performance incentives managers focus on making the numbers instead of making a difference meeting set goals instead of maximizing potential With their compensation at stake managers often resort to deceitful even unethical behavior In the end everybody loses the employee the company and ultimately the customer Now finance experts Jeremy Hope and Robin Fraser reveal the results of an intensive study aimed at fixing the broken budgeting process They argue that companies must abandon traditional budgeting contracts in favor of a radical new model that links performance measurement to evolving competitive benchmarks and shifts the firm's focus from controlling employee behavior to delivering customer value The Beyond Budgeting model is built on the best practices of companies that have successfully revised their centralized planning and budgeting processes It combines a leadership vision that devolves more authority to operating managers and a finance vision that enables fast decision making through appropriate tools and accessible information Through vivid examples Hope and Fraser illustrate how companies can implement these shared visions and the long term benefits that accrue from embracing them Offering a compelling case for breaking free from the budgeting trap this book paves the way toward making organizations better places to work for invest in and do business with

*The Little Book of Beyond Budgeting* Dr Steve Morlidge,2017-11-01 It is difficult to think of a business process that is as widely unpopular dysfunctional and discredited as traditional budgeting yet over a decade after the creation of the Beyond Budgeting movement many business people are unaware of its existence And many of those that have heard of it find the Beyond Budgeting ideas difficult to grasp because they have been conditioned by experience to think in a very narrow way about the process of management This book fills in these gaps in awareness and understanding by answering the question what is Beyond Budgeting in a clear and succinct way to help you make informed choices about the way that you run your business as an alternative to blindly copying your predecessors Amongst the things you will discover are How the financial operating model used to organise and run the affairs of an enterprise impacts many aspects of corporate life not just the level of business performance The universal law of complexity that explains why traditional budgeting will always fail to deliver what it promises predictable performance How the Beyond Budgeting process model is better equipped to deal with the complexity of modern organisational life and the uncertainty of the world Why and how an organisation has to be designed to complement the processes used to plan and control its activities How to bring about change The goal is to help build healthier more adaptive organisations better able to meet the challenges and exploit the opportunities thrown up by the modern world

**Understanding why 'Beyond Budgeting' Has Not Been Widely Adopted** Phil Hudson,2012 This research aims to understand why Beyond Budgeting a management accounting innovation has not been widely adopted The traditional budgeting process has been the dominant control mechanism for managing businesses for over 100 years It has been much criticised over the years and the shortcomings have been extensively documented There have been attempts to develop and improve the budgeting process or elements of it with Beyond Budgeting being the most recent heavyweight solution put forward Beyond Budgeting was announced as a CAM I project in 1997 and presented at the end of the project as

a general management model by Hope Fraser in 2003 The proponents of Beyond Budgeting report significant benefits from implementing it but despite the criticisms of the traditional budget the adoption level of Beyond Budgeting has been low During the literature review theories relevant to the adoption of new management accounting innovations were identified and research questions were derived The multiphase empirical research took a two phase approach In the first phase management accountants worldwide accessed through the Chartered Institute of Management Accountants CIMA were surveyed using a web based questionnaire which culminated in 185 replies In the second phase following the analysis of the questionnaires semi structured interviews were conducted with 50 respondents who had signalled their willingness to participate The interviews gave further depth to the research expanding into areas not covered by the survey From the empirical research it was concluded that although adoption of the concept of Beyond Budgeting as a whole has been low the constituent parts of Beyond Budgeting are being adopted more widely than previously believed but often not using the term Beyond Budgeting and also by managers who have not heard of the term Abandoning the traditional budget a cornerstone to moving to the concept as a whole has turned out to be one of the biggest hurdles to its wider dissemination Regulatory and other stakeholder pressure obliges organisations to compile annual budgets added to which accountants and non finance managers are comfortable with budgeting and understand it This has led to certain Beyond Budgeting techniques being introduced while retaining the traditional budget Practical recommendations to professional bodies for more effective dissemination of innovations in future and a summary of pitfalls hindering the implementation of management accounting innovations make up the contribution to practice The research contributes to theory by adding to the body of literature on the adoption of Beyond Budgeting comparing the results with the findings of prior research underlining the continuing relevance of existing theories by using their explanatory power to underpin the findings documenting additional insights not found in the literature and by proposing a theoretical framework to document factors preventing the adoption of management accounting innovations
