

## THE USER INTERFACE

The user has a display and four keys for controlling status and programming of the instrument.

### KEYS AND MENUS

UP key		Scrolls through the menu items Increases the values
DOWN key		Scrolls through the menu items Decreases the values
FUNC key		ESC function (exit)
SET key		Accesses the setpoint Accesses the menus Confirms the commands

The instrument has two main menus: the "Machine Status" and "Programming" menu.

### ACCESSING AND USING MENUS

The instrument is programmed by menus. To access a menu, press and quickly release the "SET" key ("Machine status" menu) or press the "SET" key for over 5 seconds ("Programming" menu). To access the contents of each folder, indicated by the relevant label, just press the "SET" key once.

You can now scroll through the contents of each folder, modify it or use its functions. If you do not use the keyboard for over 15 seconds (time-out) or if you press the "FUNC" key once, the last value shown on the display is confirmed and you return to the previous screen mask.

### MACHINE STATUS MENU

To access the "Machine Status" menu, press and quickly release the "SET" key. The "Set" folder label appears. To view the Setpoint value, press the "SET" key again. The Setpoint value appears on the display. To change the Setpoint value, use the "UP" and "DOWN" keys within 15 seconds. If the parameter is LOC = y the Setpoint cannot be changed.

### PROGRAMMING MENU

To enter the "Programming" menu, press the "SET" key for more than 5 seconds. If specified, the access PASSWORD will be requested. (parameter "PA1"), and the label of the first folder will follow. To scroll through the other folders, use the "UP" and "DOWN" keys. To enter the folder, press "SET". The label of the first visible parameter appears. To scroll through the other parameters, use the "UP" and "DOWN" keys. To change the parameter, press and release "SET" then set the desired value with the "UP" and "DOWN" keys, and confirm with the "SET" key, to move to the next parameter.

### COPY CARD

The Copy Card is an accessory that connected to the serial door TTL permits both fast programming of instrument's parameters (download), and the possibility to save the instrument's parameters (upload) in order to use them to re-program other equivalent instruments. To do this operation enter the folder identified from label "FPr" and use parameters "UL" or "dL" depending on the case, to start uploading (downloading) simply press "SET" button.

### KEYBOARD LOCKING

The instrument includes a facility for disabling the keyboard, by programming the "Loc" parameter (see folder with "Dis" label). If the keyboard is locked, you can still access the programming menu by pressing the "SET" key. The Setpoint can also be viewed.

## DIAGNOSTICS

The alarm condition is always signalled by the buzzer (if present) and by the led of the alarm icon.

The alarm signal produced by a faulty room probe (probe 1) is shown as E1 on the instrument display 1.

## INSTALLATION

The instrument is designed for flush panel mounting. Insert the unit through a 71x29 mm panel cut-out and affix with the U-bracket supplied.

Select a location which will not be subject to high humidity or condensation and allow some ventilation to provide cooling to the instrument.

## ELECTRICAL CONNECTIONS

Attention! Never work on electrical connections when the machine is switched on. The instrument is equipped with screw terminal boards for connection of electrical cables with a diameter of 2.5 mm<sup>2</sup> (one conductor only per terminal for power connections). For the capacity of the terminals, see the label on the instrument. Relay outputs are voltage free. Do not exceed the maximum permissible current – in case of higher loads, use a contactor of adequate power. Make sure that the supplied voltage matches the values specified for the instrument.

In the versions supplied on 12V, the power supply must be provided via a safety transformer protected by a 250 mA delayed fuse. The probes do not have any insertion polarity and can be lengthened by using a normal bipolar cable (note that if the probes are lengthened, this will affect the behaviour of the instrument in terms of EMC electro-magnetic compatibility – wiring must be done with great care). We advise you to keep the probe and supply cables well away from the power cables.

## CONDITIONS OF USE

### PERMITTED USE

For safety reasons the instrument must be installed and used according to the instruction provided and in particular, under normal conditions, parts bearing dangerous voltage levels must not be accessible.

The device must be adequately protected from water and dust as per the application and must also only be accessible via the use of tools (with the exception of the frontset).

The device is ideally suited for use on household appliances and/or similar refrigeration equipment and has been tested with regard to the aspects concerning European reference standards on safety.

### LED

Position	Associated function	Status
	Relay 1	ON for relay ON, Flashing for delay, disabled protection or activation
	Alarm	ON for an active alarm
