Throughout developed countries, increased attention has been paid to this disorder due in large part to advanced imaging technology and the development of new therapeutic pharmaceutical agents. *Multiple Sclerosis for the Practicing Neurologist*, edited by Joel Oger MD and Adnan Al Araji MB, offers a practical review of this disabling condition, especially focused on the evaluation and treatment of patients in low resource environments which lack these new technologies. It is the fifth volume in a series of clinically oriented titles developed under the auspices of the World Federation of Neurology. This volume gives concise, useful clinical information for practicing neurologists, providing a straightforward overview of each topic and including many representative case studies. Drs Oger and Al Araji effectively demonstrate that a diagnosis of multiple sclerosis is possible and acceptable without expensive tests and equipment such as MRIs. In parallel, treatment options that avoid costly disease-modifying drugs have been stressed throughout. Topics covered include: Diagnosis and diagnostic tests; Symptom management and immunotherapy; Multiple sclerosis rating scales; Clinical trials in multiple sclerosis. *Multiple Sclerosis for the Practicing Neurologist* is the first volume to address the issues faced by neurologists with limited resources who must deliver care to MS patients.
