PASSENGER SAFETY

All vehicle occupants, including those in the rear, must buckle up for safety - even if it's just a short trip. For the best possible protection by the seat belts and airbags.

Correct seat position

On seat position, the front seats lie close to the steering wheel or the instrument panel. Occupants should sit in an upright position. The top of each headrest should be at the seat occupant's eye level or higher. Occupants should keep their feet in the foot well while the vehicle is being driven.

Correct safety belt position

The shoulder belt must be positioned over the center of the occupant's shoulder. The top portion of the belt must be positioned as low as possible across the pelvis. The belts should always fit snugly like a straitjacket.

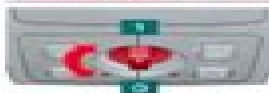

7. **WARNING: The distance from the center of your breastbone to the center of the safety cover on the steering wheel or instrument panel must be at least 10 inches (25 cm) or more.**

8. **WARNING: Thoroughly review your Owner's Manual for warnings and other important information about proper seatbelt use and reducing the risk of injury in accidents. Failure to properly use restraint systems can cause serious personal injury.**

9. **WARNING: Always wear your seat belt before driving off. Always buckle your seat belt before the vehicle begins to move. Children 12 years old and younger must ride in the rear seat and be properly restrained as described in the Owner's Manual. They are not to be seated in the front seat unless a proper safety seat is used.**
