Davis,1998 A truly classic air pollution text this book is suitable for a variety of engineers and scientists who wish to gain an introduction to the field of air pollution Known for its detailed development and application of equations the text emphasizes an understanding of the relationship between sources and control of air pollution rather than being a simple handbook on the subject The book presents information on four broad areas of interest in the air pollution field the effects of pollutants on health and welfare the laws and regulations that have been passed in efforts to improve air quality the modeling of atmospheric dispersion of pollutants the approaches to the control of emissions from both stationary and mobile sources The third edition of this text has been modified in a number of ways New material has been added to bring the text up to date on the latest regulations including the Clean Air Act Amendments of 1990 The latest standards for ambient air quality and emission have been included in this revision The

authors continue to expose students to both the quantitative and the qualitative aspects of air quality management and air pollution control with several new questions and problems with SI units emphasized to a greater extent than in the previous edition The internet is also introduced as a valuable source of additional information A web page is maintained by the authors which provides links to sources of interest to both instructors and students

**Motor Business Japan** ,1995      **World Resource Review** ,2004      History of Electric Cars Nigel Burton,2013-06-30 One hundred years ago electric cars were the most popular automobiles in the world In the late nineteenth century and at the start of the twentieth century they outsold every other type of car And yet within a couple of decades of the start of the twentieth century the electric car had vanished Thousands of battery powered cars disappeared from the streets replaced by the internal combustion engine and their place in the history of the automobile was quietly erased A century later electric cars are making a comeback Fears over pollution and global warming have forced manufacturers to reconsider the electric concept A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins It examines how and why electric cars failed the first time and why today s car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again The book examines in detail Early vehicles such as the Lohner Porsche petrol electric hybrid of 1901 Key figures in the history of the electric car development such as Henry Ford Sir Clive Sinclair s plans to build a number of electric vehicles designed to sit alongside the Sinclair C5 The return of the electric technology to vehicles as diverse as the NASA Lunar Rover commuting vehicles and supercars Future developments in electric cars For the first time the full story of electric cars and their hybrids are examined The hidden past of the electric automobile is uncovered and its future developments are discussed Superbly illustrated with 300 colour photographs many of which are rare and original sketch designs Nigel Burton has written and lectured on cars and automotive history for more than twenty years
