EBOOK: Masculinities in Mathematics Heather Mendick,2006-06-16 The book speaks to me as one of those texts that will become seminal in mathematics education It is original refreshing and despite a complicated plot points to some ways forward It is engagingly written if at times perhaps a little bit no nonsense in tone It will be of interest to teachers and teacher educators as well as providing a theoretical stance that should inform future research Review from BERJ 2007 The study of mathematics together with other gendered subjects such as science and engineering usually attracts more male than female pupils particularly at more advanced levels In this book Heather Mendick explores this phenomenon addressing the important question of why more boys than girls choose to study mathematics She combines new research with an original theoretical approach to argue that doing mathematics is doing masculinity The book illuminates what studying mathematics means for both students and teachers and offers a broad range of insights into students views and practices In addition to the words of young people learning mathematics the masculinity of mathematics is explored through historical material and cinematic representations Heather Mendick discusses the ways in which the alignment of mathematics with masculinity creates tensions for girls and women doing the subject These tensions are sensitively explored through interviews with young men and women to show how doing mathematics fits or conflicts with their gender identities Finally the book explores the implications for teachers including ways to promote gender equity in mathematics education This is key reading for students on courses in gender and education mathematics education gender and curriculum and social justice **Maths** Paul Broadbent,2010-10 Complete coverage of the KS1 Math curriculum is provided in this accessible revision guide Your child can prepare for in school assessments and test with confidence The engaging characters motivate children to test their knowledge and improve their understanding of the topics covered in school

AQA GCSE Mathematics Foundation Success Workbook (2011 Exams) ,2008-09 This workbook offers accessible practice to help manage GCSE Maths revision and prepare for the exam efficiently The content is broken into manageable sections and advice is given to help build confidence Tips and techniques provide support throughout the revision process **The British National Bibliography** Arthur James Wells,2003 **Mathematics** Candia Morgan,Clare Tikly,Anne Watson,2012-11-12 This accessible and thought provoking book considers what beginning teachers need to know

about learning teaching assessment curriculum and professional development in the context of teaching mathematics to eleven to nineteen year olds It is part of a new series of books that has as its starting point the fact that PGCE students are already subject specialists The authors show how mathematics teachers can communicate their own enthusiasm for the subject and inspire their pupils to learn and enjoy learning They provide practical advice which will help teachers and student teachers to plan organize manage and assess classroom work make decisions about the content ordering and level of difficulty of lessons make sense of new subject material and how it contributes to wider educational aims develop professionally by developing the subject as a whole This is a comprehensive introduction to teaching mathematics in the secondary school which will be invaluable to teachers beginning their careers and those who are training to be mathematics teachers

Many Visions, Many Aims W.H. Schmidt, Curtis C. McKnight, Gilbert Valverde, Richard T. Houang, David E. Wiley, 1997-02-28 PREFACE The Third International Mathematics and Science Study TIMSS sponsored by the International Association for the Evaluation of Educational Achievement IEA and the governments of the participating countries is a comparative study of education in mathematics and the sciences conducted in approximately 50 educational systems on five continents The goal of TIMSS is to measure student achievement in mathematics and science in participating countries and to assess some of the curricular and classroom factors that influence student learning in these subjects The study will provide educators and policy makers with an unparalleled and multidimensional perspective on mathematics and science curricula their implementation the nature of student performance in mathematics and science and the social economic and educational context in which these occur TIMSS focuses on student learning and achievement in mathematics and science at three different age levels or populations Population 1 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 9 year old students Population 2 is defined as all students enrolled in the two adjacent grades that contain the largest proportion of 13 year old students and Population 3 is defined as all students in their final year of secondary education including students in vocational education programs In addition Population 3 has two specialist subpopulations students taking advanced courses in mathematics mathematics specialists and students taking advanced courses in physics science specialists
