Ostrow,1999 In Making Problems Creating Solutions Jill Ostrow rethinks the teaching of mathematics and shows teachers how to build challenging learning environments in elementary classrooms She introduces the notion of workshop learning in mathematics and demonstrates ways in which teachers can readily integrate math into all curricular areas Traditional mathematics instruction consists of statements of rules followed by examples which define those rules the tell show and do model Under this model math concepts are fed to students in a sequence determined by the teacher rather than the intellectual readiness of the child Alternatively Jill takes a process approach to mathematics acquisition that is based upon understanding challenge independence confidence and choice Such an approach makes it easier for kids to apply their knowledge to new problems and to other areas of their lives Making Problems Creating Solutions gives educators a chance to see the NCTM Standards as well as many other mathematics curricula put into authentic practice provides examples of solutions and thinking strategies of students ages 6 to 12 describes a new and innovative approach to teaching calendar contains a large section on assessment features an extensive appendix of problems with each problem annotated to show which standard is being addressed This book shows teachers how to encourage kids to create problem solving strategies and then to share and discuss those strategies with peers It is an appropriate text for both preservice and inservice programs as well as math inservice workshops In Making Problems Creating Solutions Jill places meaning and purpose at the heart of her mathematics program and in turn gives teachers ideas and techniques that will inspire critical thinking in young mathematicians **Mathematical and Analogical Reasoning of Young Learners** Lyn D. English,2004-07-19

Mathematical and Analogical Reasoning of Young Learners provides foundational knowledge of the nature development and assessment of mathematical and analogical reasoning in young children Reasoning is fundamental to understanding mathematics and is identified as one of the 10 key standards for school mathematics for the new millennium The book draws on longitudinal and cross cultural studies conducted in the United States and Australia of children s reasoning development as they progressed from preschool through the end of second grade The multifaceted analysis of young children s development of mathematical and analogical reasoning focuses on individual learners their learning environments and the interaction between the two The multidisciplinary team of authors present multiple perspectives and multiple methodologies

and provide valuable information on organizing and sustaining interdisciplinary and cross cultural inquiry Key issues addressed include the relationship between mathematical and analogical reasoning how changes in children s reasoning relate to the implicit instruction they receive in their classrooms analyses of the participating teachers knowledge beliefs and practices with respect to mathematical and analogical reasoning of young learners and ways in which we might promote development of mathematical and analogical reasoning in young children This volume is highly relevant for mathematics educators researchers in mathematics education educational psychologists early childhood teachers and others interested in mathematical development of young children in particular the development of their reasoning processes **The Software**

**Encyclopedia 2001** ,2001 *Learning and Teaching Early Math* Douglas H. Clements,Julie Sarama,2020-12-29 The third edition of this significant and groundbreaking book summarizes current research into how young children learn mathematics and how best to develop foundational knowledge to realize more effective teaching Using straightforward practical language early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers understand children s level of mathematical understanding and lead to better teaching By focusing on the inherent delight and curiosity behind young children s mathematical reasoning learning trajectories ultimately make teaching more joyous helping teachers understand the varying levels of knowledge exhibited by individual students it allows them to better meet the learning needs of all children This thoroughly revised and contemporary third edition of *Learning and Teaching Early Math* remains the definitive research based resource to help teachers understand the learning trajectories of early mathematics and become confident credible professionals The new edition draws on numerous new research studies offers expanded international examples and includes updated illustrations throughout This new edition is closely linked with *Learning and Teaching with Learning Trajectories LT 2* an open access web based tool for early childhood educators to learn about how children think and learn about mathematics Head to [LearningTrajectories.org](http://LearningTrajectories.org) for ongoing updates interactive games and practical tools that support classroom learning *Essential Skills Math!* Teacher Created Resources, Inc,2008-12 2 CD ROMs Bonus parent materials English Spanish Cover *The Unschooling Handbook* Mary Griffith,2010-05-05 To Unschoolers Learning Is

As Natural As Breathing Did you know that a growing percentage of home schoolers are becoming unschoolers The unschooling movement is founded on the principle that children learn best when they pursue their own natural curiosities and interests Without bells schedules and rules about what to do and when the knowledge they gain through mindful living and exploration is absorbed more easily and enthusiastically Learning is a natural inborn impulse and the world is rich with lessons to be learned and puzzles to be solved Successful unschooling parents know how to stimulate and direct their children s learning impulse Once you read this book so will you *Child Development and Personality* Paul Henry Mussen,1990 New edition of a standard introductory text *Curriculum-based Assessment* Carroll J.
