bomber Although the prototypes were completed largely by the end of 1941 delays in the supply of the engines meant that it  
was not until July 1943 that the type first flew By the end of the war more than 220 of the type had been constructed  
although only a small proportion of these had actually entered service The first of Midland Publishing's new Military Aircraft  
in Detail series provides a detailed history of the development and operation of the Ar 234 supported by many photos line  
drawings and specially commissioned artworks The camouflage schemes applied to the aircraft are also examined many of  
the illustrations are previously unpublished making the book an essential addition to the limited range of publications  
available on this important aircraft type Aimed specifically at the aviation modeler and those interested in the history of the
