Since its entry into the digital market, Panasonic has made tremendous strides in the products and services offered. The growth of the company also saw its expansion into the production and distribution of digital cameras. One of the new digital releases comes in the form of the Panasonic Lumix FZ30. This camera, launched in late 2015, boasts a plethora of features. It was designed to serve as the replacement for the previously released Lumix FZ20. It is one of Panasonic's super zoom cameras and is designed for ease of use by both amateurs and professional photography. The camera, like its predecessor, is outfitted with a wide range of modern and convenient features. It, however, boasts novel features that include a nine-pixel CCD readout that creates enhanced LCD and EVF performance, aligned tripod mount and lens configuration, a deeper hand grip for a more secure hold, and an improved add-on ND filter. Users will also be able to enjoy features such as a 4.4-inch electronic viewfinder with 2.3k pixels of resolution, an orientation sensor, and a 2-inch TFT LCD 2.3k pixel resolution monitor.
