

What is the Screening?

- The screening we use is called LUCID Rapid. The children are taken out in a small group, each child wears headphones and goes through the activities on a laptop. It takes approximately 15 minutes.
- There are three parts, they identify difficulties with:
 1. phonological processing,
 2. auditory memory and
 3. visual verbal integration (phonic decoding skills)

(During the workshop parents were shown the computer based test).

- Below is a link to the LUCID manual which has some very useful explanations of the screening tool, case studies with how the results are interpreted and suggestions for ways to support children's phonological processing and auditory memory at home:
