Playing Utopia Benjamin Beil, Gundolf S. Freyermuth, Hanns Christian Schmidt, 2019-11-07 Media narratives inform our ideas of the future and Games are currently making a significant contribution to this medial reservoir On the one hand Games demonstrate a particular propensity for fantastic and futuristic scenarios On the other hand they often serve as an experimental field for the latest media technologies However while dystopias are part of the standard gaming repertoire Games feature utopias much less frequently Why This anthology examines playful utopias from two perspectives It investigates utopias in digital Games as well as utopias of the digital game that is the role of ludic elements in scenarios of the future

Violent Games Gareth Schott, 2016-07-28 It was over a decade ago that experimental psychologists and media effects researchers declared the debate on the effects of violent video gaming as essentially over referring to the way violence in videogames increases aggressive thoughts feelings and behaviors in players Despite the decisive tone of this statement neither the presence nor popularity of digital games has since diminished with games continuing to attract new generations of players to experience its technological advancements in the narration of violence and its techniques of depiction Drawing on new insights achieved from research located at an intersection between humanities social and computer sciences Gareth Schott's addition to the Approaches in Digital Game Studies series interrogates the nature and meaning of the violence encountered and experienced by game players In focusing on the various ways violence is mediated by both the rule system and the semiotic layer of games the aim is to draw out the distinctiveness of games exploitation of violence or violent themes An important if not canonical text in the debates about video games and violence Violent Games constitutes an essential book for those wishing to make sense of the experience offered by games as technological aesthetic and communicational phenomena in the context of issues of media regulation and the classification of game content as violence

Language, Culture, Computation: Computing for the Humanities, Law, and Narratives Nachum Dershowitz, Ephraim Nissan, 2014-12-04. This Festschrift volume is published in Honor of Yaacov Choueka on the occasion of his 75th birthday. The present three volumes, *liber amicorum* several years in gestation, honour this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaacov's research has had a major impact not only within the walls of academia but also in the daily life of lay users of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s, a project in which he is currently involved is proving to be a sensation as will become apparent from what follows. Yaacov Choueka began his research career in the theory of computer science dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages, Yaacov moved to natural languages. He was a founder of natural language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role together with Aviezri Fraenkel in the development of the Responsa Project, one of the earliest fulltext retrieval systems in the world. More recently, he has headed the Friedberg Genizah Project which is bringing the treasures of the Cairo Genizah into the Digital Age. This second part of the three volume set covers a range of topics related to the application of information technology in humanities, law and narratives. The papers are grouped in topical sections on humanities computing, narratives and their formal representation, history of ideas, the numerate disciplines, law, computer law and legal computing.
