Hill,2014-12-15 One of the most beautiful natural phenomena we can see here on Earth is that of solar and lunar eclipses Through perfect orbital timing these events can cause the Sun to disappear and darken the sky in the middle of the day or even to create an eerie red glow seemingly by magic This book strips the magic away to provide the space science behind these incredible events Moonstrology Sara Wiseman,2021-01-24 I love the moon I love its power its mystery the way it offers Universal connection to each of us no matter where we are in the world or in the time passage of our lives I love the changeable nature of the moon the way it sways the water in our bodies and in the greater body of Gaia s oceans There is love there is enchantment and when we are very still and very aware the moon communicates wisdom There are many extraordinary books about the cycles of the moon which cover phases in minute detail These are wonderful and offer great help to people who are interested in the deep study of pagan or shamanistic paths This book is much simpler It is designed to be a twice monthly and in some months more frequent touchstone to help you connect to the energy of the moon in its two most powerful spiritual phases the new moon and the full moon As you become aware of the new and full moons in your life and begin to work with this moon energy you will find you becoming spiritual clear you set intention at new moon using the influence of the sign the moon is entering and you release at full moon using the influence of the sign the moon is leaving Over the course of a year you will visit 12 or more signs in both the cycle of beginning and releasing and you will have journeyed through a complete astrological cycle physically emotionally and spiritually Because the moon does not inhabit the same position on the same days ever year I have provided several moon phase calendars for the upcoming years If you are reading this book after the last calendar listed no problem Simply go online and look for moon lunar phrases or moon astrological phases to determine the exact date and time of the new and full moons in upcoming years The information is free and readily available and will be easy to find Finally I ve decided to present Moonstrology in the order the moon cycles normally move through a calendar year beginning in January

For example we often begin with a new moon in Capricorn full moon in Cancer This is not how it works every January but it is the order that you will most likely experience In cases of lunar eclipses expanded or moon phases or solar eclipses these also happen differently every year I would suggest you consult the calendars or again research your own in later years Finally this book is channeled I approach spiritual connection with the moon in the same way I do all things which is via direct connection with the Universe I close my eyes breathe deeply until I am relaxed and slip into a meditative trance state where the words flow through me onto the page Because of the way this information is received it is probably or even certainly different than what you will find in other books It is my offering to you in hopes that it will spark a new understanding and a new way of working with this marvelous Divine mystery that is the moon
