

PRO LX5 5-Inch 2-Way Metal Cabinet Speaker

INTRODUCTION

This speaker's internal elements were exclusively designed to maintain shape through all phases of operation, move diaphragm elements with efficient speed, and produce high frequencies extremely well.

The 5" driver in this speaker is specially designed to accurately produce all sonic information from 85 Hz to 2.5 kHz. The pliable diaphragm in the 2" x 4" driver can accurately, and with extraordinary low distortion, produce sonic information from 2.5 kHz to 25 kHz. Its unique design means there is virtually no physical limitation to its production of high-frequency sound.

This speaker gives you amazing music reproduction in a small enclosure. It produces high sound quality with very low distortion, and actually delivers decreasing distortion as the sound moves to the higher frequency ranges.

Its features include:

Cnæum® Tweeter — uses a pliable diaphragm to reduce or eliminate distortion caused by excess vibration. It also can reproduce higher frequencies (over 20 kHz) without being limited by its physical construction.

High-Compliance Woofer — accurately tracks signals to provide outstanding bass.

Acoustic Design — provides broad, smooth frequency response.

Die Cast Aluminum Cabinet — prevents sound leakage.

SPEAKER PLACEMENT

For the best stereo image, place a pair of speakers so the distance between them is about the same as the distance between the listening area and the point halfway between the speakers.

If you must place the speakers farther apart, turn them slightly inward. If you must place them closer to each other, turn them slightly outward. You might want to experiment with your speakers' placement to discover the best location for them.
