**Meteorology! Unable to Prevent Climate Change and World Wars?** Arnd Bernaerts,2012 The Second World War stands  
for the criminal madness of German Nazi government Less known is their responsibility for the only climatic shift from warm  
to cold in an otherwise constantly warming world over the last 150 years Not knowing the reason for the biggest climatic  
shift since industrialization which started in winter 1939 40 rectifies to speak about failures of meteorology Only four months  
into Second World War Northern Europe experienced the coldest winter in 100 years The reason plain physics Naval war in  
Northern European seas released the summer heat too quickly Polar air got free access to Europe The same applies to the  
second and third war winter Europe was back in the Little Ice Age After Japan attacked Pearl Harbor on Dec 7th 1941 naval  
war became a global affair In close conformity with naval war in European seas and subsequently in the Pacific a pronounced  
global cooling took place which lasted until about the mid 1970s Furthermore a thorough research of strong warming in the  
Northern Hemisphere from winter 1918 19 to winter 1939 40 would have revealed a convincing link to naval war in Europe  
from 1914 to 1918 But climatology does not care The connection between two naval wars and two climatic changes within 25  
years has not yet been investigated and explained If they had warned governments about the threat of climate change as  
their successors currently do with the greenhouse effect naval activities in two World Wars may have been prevented or at  
least been limited Claims to understand climate should be regarded as a failure as long as meteorology is unable to explain  
the two most pronounced climatic shifts during the last century and the role two world wars had in this game These two  
events would show that the oceans have a dominate role in the climate system and man is able to change its direction by  
intensive activities in the marine environment It took four months to generate the extreme regional winter 19     **Northwest**
