Effective Crisis Response and Openness Simon J. Evenett, Bernard M. Hoekman, Olivier Cattaneo, 2009 The purpose of this book is to examine the various ways in which the existing manifestations of openness including binding international accords have constrained or enhanced the options available to national policymakers during the crisis and influenced the degree and potentially even the effectiveness of cross border cooperation By examining state responses during the crisis in a number of distinct policy domains this approach may shed light on potential complementarities and tensions as governments seek to tackle sharp national recessions while being mindful of the growing role that the international dimension has played in influencing national economies in an era of globalization In principle such an examination may reveal that some permutations of national policy choices and international trade and other obligations offer greater potential than others in turn providing information on the possible scope for both domestic reforms and the global trade architecture **Innovation and Change**
