Decision History

Production Room

Congratulations, You have successfully given the board your demand estimates. You now need to make some key decisions on how to fulfill this demand.

To increase production flexibility, management has decided to outsource all manufacturing, and four contract manufacturers have been identified. Casey will provide you with some additional information on the four manufacturers and their policies.

Talk to Procurement

Previous

Casey

Place your orders with the suppliers you want to use. Let me know if you would like to alter your orders in the Suppliers area of the Production Room. One thing you should know is that I'll be on a Mediterranean cruise for the next month or so. Good luck!

You can place orders with one or more of the four suppliers. As you consider which suppliers to choose, consider lead times, set-up costs, and capacities.

Keep a watchful eye on inventory levels, as it will cost you to carry units that are not sold into the same month, and excess inventory at the end of the year is liquidated below cost.

Marketing Opportunity

Jessica
Marketing

Good morning. I am Jessica from the Marketing Department. We have an exciting opportunity coming up, and I need your decision.

We are thinking of creating an annual conference called CELLDEX. This conference would allow us to showcase our new models and collect valuable customer feedback.

Hosting CELLDEX would allow us to obtain some new demand estimates for some of our mobile phone lines. These estimates would be much more accurate than the numbers that we have today.

The upside is that if we get your approval now, we can set up the event for the end of March and automatically insert new and better demand estimates directly into your production schedule at the beginning of April.

The downside to creating this event is that it will be very expensive to set up, as we would need to create a global industry event from scratch. Our current budget for such an event calls for \$2,000,000.

Would you like us to set up this industry conference for \$2,000,000?

Harvard Global Supply Chain Simulation Solutions:

Innovative Solutions for Implementing Global Supply Chains in Emerging Markets Dwivedi, Ashish, 2016-01-28

Advancements in the field of information technology have transformed the way businesses interact with each other and their customers. Businesses now require customized products and services to reflect their constantly changing environment, yet this results in cutting edge products with relatively short lifecycles. *Innovative Solutions for Implementing Global Supply Chains in Emerging Markets* addresses the roles of knowledge management and information technology within emerging markets. This forward thinking title explores the current trends in supply chain management, knowledge acquisition and transfer mechanisms among supply chain partners and knowledge management paradigms. This book is an invaluable resource for researchers, business professionals and students, business analysts and marketing professionals.

Supply Chain and Operations Analytics Rabindranath Bhattacharya, Anindita Maitra Bhattacharyya, 2025-06-11. This book presents the concepts, strategies and decision making processes of supply chain and operations management through simple to advanced analytics. It provides the tools necessary to comprehend supply chain and operations management quantitatively and analytically through exercises and examples. Using accessible quantitative models, the volume provides a unified framework for supply chain analytics for products right from sourcing to manufacturing to delivery and remanufacturing, which closes the supply chain. The book synthesizes a collection of models in all areas of the supply chain such as sourcing, inventory, production planning and control, forecasting of demand, transportation network planning and design, data aggregation and mining and the return of products in the context of both the formulation and solution of the problems in each area using suitable software and Excel Solver for ease of understanding. The use of simulation and stochastic and system design models are added attractions of the book. This book will be useful to students, researchers and faculty working in the field of supply chain management, operations management and industrial engineering both at graduate and research levels. It will also be an invaluable companion to consultants and practitioners working with models and modelling systems, helping them to make better supply chain decisions.

process Artificial Intelligence and Online Engineering Michael E. Auer, Samir A. El-Seoud, Omar H. Karam, 2022-10-14

Nowadays online technologies are the core of most fields of engineering and the whole society and are inseparably connected for example with Internet of Things Industrial Internet of Things Industry 4.0 Online Biomedical Engineering Data Science Machine Learning and Artificial Intelligence Cross Mixed Reality and Remote Working Environments to name only a few. Since the first REV conference in 2004 we tried to focus on the upcoming use of the Internet for engineering tasks and the opportunities as well as challenges around it. Consequently the motto of this year's REV2022 was Artificial Intelligence and Online Engineering. In a globally connected world the interest in online collaboration teleworking remote services and other digital working environments is rapidly increasing. In response to that the general objective of this conference is to contribute and discuss fundamentals applications and experiences in the field of Online and Remote Engineering Virtual Instrumentation and other related new technologies like Cross Reality Data Science Big Data Internet of Things Industrial Internet of Things Industry 4.0 Cyber Security and M2M Smart Objects. Another objective of the conference is to discuss guidelines and new concepts for engineering education in higher and vocational education institutions including emerging technologies in learning MOOCs MOOLs and Open Resources. REV2022 was the 19th in a series of annual events concerning the area of Online Engineering. It has been organized in cooperation with The British University in Egypt BUE Cairo as a hybrid event from February 28 until March 02 2022.
