Trumbull, Carrie Rothstein-Fisch, Patricia M. Greenfield, Blanca Quiroz, 2001-04-01 Bridging Cultures Between Home and School A Guide for Teachers is intended to stimulate broad thinking about how to meet the challenges of education in a pluralistic society. It is a powerful resource for in-service and preservice multicultural education and professional development. The Guide presents a framework for understanding differences and conflicts that arise in situations where school culture is more individualistic than the value system of the home. It shares what researchers and teachers of the Bridging Cultures Project have learned from the experimentation of teacher-researchers in their own classrooms of largely immigrant Latino students and explores other research on promoting improved home-school relationships across cultures. The framework leads to specific suggestions for supporting teachers to cross-cultural communication organization, parent-teacher conferences that work, use strategies that increase parent involvement in schooling, increase their skills as researchers, and employ ethnographic techniques to learn about home cultures. Although the research underlying the Bridging Cultures Project and this Guide focuses on immigrant Latino families since this is the primary population with which the framework was originally used, it is a potent tool for learning about other cultures as well because many face similar discrepancies between their own more collectivistic approaches to childrearing and schooling and the more individualistic approach of the dominant culture.

Science with Storytelling Jane Stenson, Sherry Norfolk, Lynette J. Ford, 2017-02-06 This book is about the intersection of storytelling and science. Recognizing that humans are hard-wired for narrative, this collection of new essays integrates the two in a special way to teach science in the K-6 classroom. As science education changes its focus to concepts that bridge various disciplines along with science and engineering practices, storytelling offers opportunities to enhance the science classroom. Lesson plans are provided, each presenting a story, its alignment with science, Next Generation Science Standards, language arts, Common Core State Standards, and theater arts standards. National Core Arts Standards. Instructional plans include a rationale, preparation activities, and assessment.
