18. **Efficiency:** "What do you mean efficiency? Efficiency means that a little sample of the light entering the eye after passing through the cornea, lens, and vitreous body is the source of a sufficient amount of the light entering the eye after passing through the cornea, lens, and vitreous body." (The author is not sure if this is the correct definition of efficiency, but it is the only one that makes sense in the context of the question.)

The light originates from the lightguide which already has, at the same time, the function of acting as a support with respect to light to reflect itself horizontally as an angle within the structure that is released into the water.
