Real-Time Digital Signal Processing Nasser Kehtarnavaz, 2011-03-15 Digital Signal Processing has undergone enormous growth in usage implementation in the last 20 years and many engineering schools are now offering real time DSP courses in their undergraduate curricula Our everyday lives involve the use of DSP systems in things such as cell phones and high speed modems Texas Instruments has introduced the TMS320C6000 DSP processor family to meet the high performance demands of today's signal processing applications This book provides the know how for the implementation and optimization of computationally intensive signal processing algorithms on the Texas Instruments family of TMS320C6000 DSP processors It is organized in such a way that it can be used as the textbook for DSP lab courses offered at many engineering schools or as a self study reference for those familiar with DSP but not this family of processors This book provides a restructured modified and condensed version of the information in more than twenty TI manuals so that one can learn real time DSP implementations on the C6000 family in a structured course within one semester Each chapter is followed by an appropriate lab exercise to provide the hands on lab material for implementing appropriate signal processing functions Each chapter is followed by an appropriate lab exercise Provides the hands on lab material for implementing appropriate signal processing functions [Readings in Hardware/Software Co-Design](#) Giovanni De Micheli, Rolf Ernst, Wayne Wolf, 2002 This title serves as an introduction and reference for the field with the papers that have shaped the hardware software co design since its inception in the early 90s [Smartphone-Based Real-Time Digital Signal Processing](#) Nasser Kehtarnavaz, Shane Parris, Abhishek Sehgal, 2022-11-10 Real time or applied digital signal processing courses are offered as follow ups to conventional or theory oriented digital signal processing courses in many engineering programs for the purpose

of teaching students the technical know how for putting signal processing algorithms or theory into practical use These courses normally involve access to a teaching laboratory that is equipped with hardware boards in particular DSP boards together with their supporting software A number of textbooks have been written discussing how to achieve real time implementation on these hardware boards This book discusses how smartphones can be used as hardware boards for real time implementation of signal processing algorithms as an alternative to the hardware boards that are currently being used in signal processing teaching laboratories The fact that mobile devices in particular smartphones have now become powerful processing platforms has led to the development of this book thus enabling students to use their own smartphones to run signal processing algorithms in real time considering that these days nearly all students possess smartphones Changing the hardware platforms that are currently used in applied or real time signal processing courses to smartphones creates a truly mobile laboratory experience or environment for students In addition it relieves the cost burden associated with using a dedicated signal processing board noting that the software development tools for smartphones are free of charge and are well developed This book is written in such a way that it can be used as a textbook for applied or real time digital signal processing courses offered at many universities Ten lab experiments that are commonly encountered in such courses are covered in the book This book is written primarily for those who are already familiar with signal processing concepts and are interested in their real time and practical aspects Similar to existing real time courses knowledge of C programming is assumed This book can also be used as a self study guide for those who wish to become familiar with signal processing app development on either Android or iPhone smartphones All the lab codes can be obtained as a software package from [http sites fastspring com bookcodes product bookcodes](http://sites.fastspring.com/bookcodes/product/bookcodes)
