Technology and the Politics of Instruction Jan Nesper, 2006 In this study of computer mediated instruction CMI in a U S research university that is the site of nationally known innovations in this area Jan Nesper traces the varying material and organizational entanglements of a constantly reconfiguring network of people things categories and ideas that are sometimes loosely sometimes tightly entangled in forms of CMI He unfolds how the different forms and meanings of CMI policy and practice were constructed over time across departments and in relation to students academic trajectories Tying together a range of issues usually separated in

discussions of instructional technology and examining often slighted topics such as the articulations of local and national practices this book questions the common vocabulary for making sense of CMI and contributes to educational change theory by showing how CMI has evolved both from the top down and the bottom up Technology and the Politics of Instruction is distinctive in its multi level approach and in the breadth of its conceptual frame Departing from the mainstream research on instructional technology to focus on mundane and widespread forms of CMI PowerPoint slides CD ROMs self paced labs and the like Nespor views these from multiple standpoints not just what they mean for professors but also for administrators and students The effect is to displace the typical emphasis in CMI research from cutting edge high resource artifacts and systems the importance of which is not questioned to the politics and organizational processes that shape the uses of such things This book is intended primarily for scholars and students in the fields of educational and more broadly organizational change the politics and sociology of education curriculum theory higher education and educational administration and will also interest instructional technologists and technology developers **Journal of Computing in Teacher Education** ,2002

Methods, Measures, and Theories in Eyewitness Identification Tasks Andrew M. Smith,Michael P. Toglia,James Michael Lampinen,2021-02-25 *Methods Measures and Theories in Eyewitness Recognition Tasks* provides a comprehensive review of the fundamental issues surrounding eyewitness recognition phenomena alongside suggestions for developing a more methodologically rigorous eyewitness science Over the past 40 years the field of eyewitness science has seen substantial advancement in eyewitness identification procedures yet theoretical and methodological developments have fallen behind Featuring contributions from prominent international scholars this book examines methodological and theoretical limitations and explores important topics including how to increase the accuracy of identifying perpetrators when using CCTV images how to create more identifiable facial composites and the differences in accuracy between younger and older eyewitnesses Providing in depth discussion on the limitations of traditional lineups eyewitness memory fallibility and the complications that arise when using laboratory simulations along with suggestions for new methods this book will be an invaluable resource for researchers in eyewitness recognition lawyers players in the criminal justice system members of innocence commissions and researchers with interests in cognitive psychology **The Impact of Internal and External Influences on Memory and their Relevance to Legal Decisions** Fabiana Battista,Antonietta Curci,Ivan Mangiulli ,Henry Otgaar,2024-08-02 The fallibility of memory has been often demonstrated A plethora of studies has focused on external influences that can affect memory reports such as suggestive questioning Adopting different paradigms e g misinformation memory conformity the recurrent pattern of findings of these studies is that suggestion can make people prone to falsely recall details that were never experienced i e commission errors false details In addition suggestion can make them unable to recall truly experienced events or event related details However internal influences can also affect memory One such internal influence is deception In the last decade several studies have investigated how memory can be affected by deception Specifically these

studies have shown that a person who has intentionally deceived the listener about an experienced event subsequently when the person comes forward with the truth shows an impaired memory for such an event This line of research examined the detrimental effects on memory by taking into account different strategies to deceive e g false denials feigned amnesia and fabrication and found that the memory outcomes due to deception can vary based on the strategy used to deceive A number of studies has also demonstrated that another type of deception known as self deception can influence our memory This strategy relies on the act of deceiving our own selves and seems to reduce the recall of negative memories The understanding of the effects of external e g suggestion and internal e g deception self deception on memory is important not only in order to gain more fundamental information on how memory works but also because of the relevance of memory functioning within the legal context Memory distortions for example inaccurate eyewitness testimony can lead to impactful legal decisions such as wrongful convictions Several studies have underlined the harmful consequences of distorted statements Additional support is found in databases from various worldwide associations who strive to obtain fair justice for people involved in wrongful convictions cases for instance www.innocenceproject.org Therefore it is important that researchers continue to provide evidence on the mnemonic impact of internal and external factors that influence legal practitioners to help avoid miscarriages of justice
