International Labor Law Kerry Rittich, 2002 *The Idea of Labour Law* Guy Davidov, Brian Langille, 2013-01-17 Labour law is widely considered to be in crisis by scholars of the field This crisis has an obvious external dimension labour law is attacked for impeding efficiency flexibility and development vilified for reducing employment and for favouring already well placed employees over less fortunate ones and discredited for failing to cover the most vulnerable workers and workers in the informal sector These are just some of the external challenges to labour law There is also an internal challenge as labour lawyers themselves increasingly question whether their discipline is conceptually coherent relevant to the new empirical realities of the world of work and normatively salient in the world as we now know it This book responds to such fundamental challenges by asking the most fundamental questions What is labour law for How can it be justified And what are the normative premises on which reforms should be based There has been growing interest in such questions in recent years In this volume the contributors seek to take this body of scholarship seriously and also to move it forward Its aim is to provide if not answers which satisfy everyone intellectually nourishing food for thought for those interested in understanding explaining and interpreting labour laws whether they are scholars practitioners judges policy makers or workers and employers

labour law Part II goes further by examining the relationship of the CA and other well established perspectives on labour law including economics history critical theory restorative justice and human rights Part III examines the possible relevance of the CA to a range of specific labour law issues such as freedom of association age discrimination in the workplace trade employment policy and sweatshop goods Corporate Law, Codes of Conduct and Workers' Rights Vanisha

Labour Law in Russia Anthony Forsyth, Elena Radevich, 2014-11-10 Russias transition towards a market economy in the early 1990s called for new approaches to the regulation of employment relations in the post Soviet period in order to strike a balance between employers interests and employees rights in changed conditions The adoption of the Labour Code of the Russian Federation LC RF in 2001 contributed to solving the issue only partly as in reality it was passed as a compromise between different political forces and consists of both provisions which can be implemented in the new context of the market economy and restrictions inherited from the planned economy The recent and ever changing socio economic conditions and the increasing complexity of the employer employee relationship which is a result of both globalization and technological progress required the further development of Russian employment legislation This resulted in substantial amendments being made to the original LC RF in 2006 with the majority of its provisions being profoundly revised Nevertheless a thorough analysis of the changes currently under way shows that many aspects concerning employment relations have still not been addressed sufficiently The papers collected in the present volume of the ADAPT Labour Studies Book Series consider the recent developments of the legal regulation of employment relations as well as some closely related aspects from a historical and comparative perspective in order to provide some insights into these issues and to examine current challenges
