Romantic period c 1760 1820 It examines writers responses to Welsh landscapes and communities at a time of drastic economic environmental and political change Opening with an overview of Welsh tours up to the early 1700s Mary Ann Constantine shows how the intensely intertextual nature of the genre imbued particular sites and locations with meaning She next draws upon a range of manuscript and published sources to trace a circular tour of the country unpicking moments of cultural entanglement and revealing how travel writing shaped understanding of Wales and Welshness within the wider British polity Wales became a popular destination for visitors following the publication of Thomas Pennant s *Tours in Wales* in the late 1770s Hundreds of travel accounts from the period are extant yet few particularly those by women have been studied in depth Wales proves in these narratives as much a place of disturbance as a picturesque haven a potent mixture of medieval past and industrial present exposed down its west coast to the threat of invasion during the Napoleonic Wars From castles to copper mines Constantine explores the full potential of tour writing as an idiosyncratic genre at the interface of literature and history arguing for its vital importance to broader cultural and environmental studies **The Booklist** ,1929
