serving as the host Nine papers were presented in the oral sessions and there were five poster presentations This monograph which is intended to provide a bird s eye view of recent trends in studies of the venous system is an outgrowth of the Gifu Workshop While it is not exactly the Proceedings of that workshop materials in the monograph were developed from ideas presented there 田中, 1950-1975 田中, 2005 Thermotherapy for Neoplasia, Inflammation, and Pain M. Kosaka, T. Sugahara, K.L. Schmidt, E. Simon, 2013-04-17 This book provides a comprehensive overview of the multitude of different forms of thermotherapy in connection with aspects of thermal physiology and cell biology The aim is to elucidate the scientific background of therapeutic actions and to promote effective new applications at the beginning of the 21st century Significant to these purposes is cooperation between experts in the fields of thermal biology hyper thermic oncology rheumatology and balneology as represented by the editors Emphasis has been placed on a balanced choice of contributions in the hope that this will enable the reader to draw helpful connections between the principles and practice of thermotherapy It is apparent that a wealth of published data exists concerning thermotherapy on the one hand and thermal physiology on the other However in the former field empirical aspects of therapeutic usefulness prevail while in the latter aspects of basic science are in the foreground Accordingly the sources where published data may be found are quite different and as a consequence many findings of potential mutual interest published in medical journals have gone unnoticed by readers of physiological journals and vice versa It is hoped that this book will bridge the gap and encourage researchers efforts to integrate the available knowledge to attain optimal coordination of clinical and theoretical aspects

Translation and the Borders of Contemporary Japanese Literature Victoria Young, 2024-06-03 This book examines contemporary debates on such concepts as national literature world literature and the relationship each of these to translation from the perspective of modern Japanese fiction By reading between the gaps and revealing tensions and blind spots in the image that Japanese literature presents to the world the author brings together a series of essays and works of fiction that are normally kept separate in distinct subgenres such as Okinawan literature *zainichi* literature written by ethnic Koreans and other trans border works The act of translation is reimagined in figurative expanded and even disruptive ways with a focus on marginal spaces and trans border movements The result decentres the common image of Japanese literature while creating connections to wider questions of multilingualism decolonisation historical revisionism and trauma that are so central to contemporary literary studies This book will be of interest to all those who study modern Japan and Japanese literature as well as those working in the wider field of translation studies as it subjects the concept of world literature to searching analysis
