The Science of Writing C. Michael Levy, Sarah Ransdell, 2013-11-05 Conceived as the successor to Gregg and Steinberg's Cognitive Processes in Writing this book takes a multidisciplinary approach to writing research. The authors describe their current thinking and data in such a way that readers in psychology English education and linguistics will find it readable and stimulating. It should serve as a resource book of theory tools and techniques and applications that should stimulate and guide the field for the next decade. The chapters showcase approaches taken by active researchers in eight countries. Some of these researchers have published widely in their native language but little of their work has appeared in English language publications. Writing and Cognition Mark Torrance, Luuk van Waes, David Galbraith, 2007-01-01 Writing is central to the functioning of developed societies. However the psychological processes that allow us to transform complex ideas into language and express them on paper or computer screen are poorly understood. Writing and Cognition goes some way towards remedying this It describes new and diverse work both by field leaders and by newer researchers exploring the complex relationships between language the mind and the environments in which writers work Chapters range in focus from a detailed analysis of single word production to the writing of whole texts. They explore the basic processes involved in writing the effects of writing on thought and how these vary across different educational and workplace contexts.
