

Structure Description**Engine**

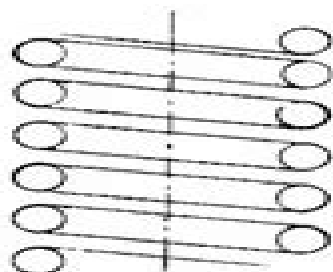

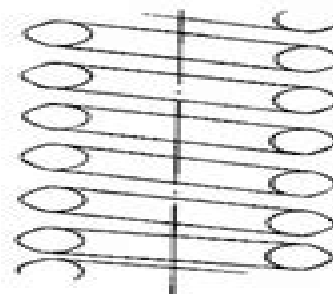

The vehicle is equipped with a water cooled inline 4 cylinder engine. The engine is inclined forward- 35°. This inclination enables an improved straight intake manifold port, which allows smooth flow of air-fuel mixture gas.

Gear drive system was applied to the cam shaft instead of chain drive system. The gear system is optimised for high speed operation. In order to provide smooth valve operation at high speed, the engine has lower shim design. Also, carbon hardened connecting rods used to reduce friction loss.

To provide smooth valve operation in high speed, the valve spring was computer designed to endure higher stress.
