Energy Culture Jillian Porter,Maya Vinokour,2023-04-06 This volume investigates energy as a shaping force in Russian and Soviet literature visual culture and social practice Chronologically arranged chapters explain how nineteenth century ideas about energy informed realist novels and paintings how the poetics of energy defined pre Revolutionary and Stalinist utopianism and how fossil fuels electricity and nuclear fission generated distinct aesthetic features in Imperial Russian Soviet and post Soviet literature cinema and landscape The volume s concentration on Russia responds to a clear need to

understand the role the country plays in social political and economic processes endangering life on Earth today The cultural dimension of Russia s efforts at energy dominance deserves increased scholarly attention not only in its own right but also because it directly affects global energy policy As the contributors to this volume argue the nationally inflected cultural myths that underlie human engagements with energy have been highly consequential in the Anthropocene
