

Het Idee Van De Functionele Stad

Eric Paul Mumford

Het Idee Van De Functionele Stad:

Het idee van de functionele stad Cornelis van Eesteren, 1997 To many people the idea of the functional city lost its former appeal after the seventies There were good reasons for that but the functional city is not something that will go away To contemporary eyes historic cities possess an enchanting and innocent beauty but once they were fully functioning centres of craft and trade Habitation work and traffic are still the dominant factors in the structure of a city The modern city is marked however by an unprecedented enlargement of scale The idea of the functional city stems from the problems associated with this phenomenon C van Eesteren was no utopian nor was he an architectural messiah His lecture on the idea of the functional city in January 1928 was a down to earth appraisal of new design tasks that had so far been completely ignored Now that the idea of the functional city is on the agenda again it is interesting to examine why the pioneers of functionalism broke with the historicizing practices of their predecessors Perhaps the choice they made was too radical This book reconstructs the historic moment of that choice Bookjacket *The CIAM Discourse on Urbanism, 1928-1960* Eric Paul Mumford, 2002 The first history of the Congres Internationaux d Architecture Moderne traces the development and promotion of its influential concept of the Functional City **Brokers of Modernity** Martin Kohlrausch, 2019-03-11 The story of modernist architects in East Central Europe The first half of the twentieth century witnessed the rise of modernist architects Brokers of Modernity reveals how East Central Europe turned into one of the pre eminent testing grounds of the new belief system of modernism By combining the internationalism of the CIAM organization and the modernising aspirations of the new states built after 1918 the reach of modernist architects extended far beyond their established fields Yet these architects paid a price when Europe s age of extremes intensified Mainly drawing on Polish but also wider Central and Eastern European cases this book delivers a pioneering study of the dynamics of modernist architects as a group including how they became qualified how they organized communicated and attempted to live the modernist lifestyle themselves In doing so Brokers of Modernity raises questions concerning collective work in general and also invites us to examine the social role of architects today Ebook available in Open Access This publication is GPRC labeled Guaranteed Peer Reviewed Content **Maak een stad** Wouter Vanstiphout, 2005 Studie waarin de werken van de Nederlandse architect 1898 1978 in Rotterdam worden beschreven in relatie tot de stedenbouwkundige veranderingen in de stad vanaf eind 19e eeuw tot en met 1945 **Stations as Nodes** Manuela Triggianese, Roberto Cavallo, Nacima Baron, Joran Kuijper, 2019-02-28 At the main point of intersection between the railway and the city stations are key elements in the organization of the intermodal transport as well as catalysts of urban developments in metropolises medium and small cities The focus of this publication is to explore the enrichment of a renewed approach of railway stations as intermodal nodes therefore acting as breeding grounds for both urban and social developments This book has been initiated and built upon several activities currently running at the Amsterdam Institute for Advanced Metropolitan Solutions AMS Institute Delft University of

Technology DIMI Delft Deltas Infrastructure Mobility Initiative and Department of Architecture of the Faculty of Architecture and the Built Environment and University of Paris Est 1 cole d Urbanisme de Paris These activities have been framed within the context of two rapidly developing metropolitan areas Randstad in the Netherlands and M tropole du Grand Paris in the Ile de France This volume forms the basis for a research on the role of stations in future metropolitan areas with the ambition to link the two countries learning from their different cities and distinct geographical context through comparable mobility challenges on the levels of the inner city suburban and peripheral areas In line with these considerations in 2018 AMS Institute TU Delft DIMI and the Dutch Embassy in Paris with Atelier N erlandais organized a successful workshop Stations of the Future in collaboration with La Fabrique de la Cit Together with Dutch and French planning entities involving mass transit operators and railway companies this workshop focused on several case studies in both metropolitan areas to understand the role of station hubs as intermodal nodes During this joint French Dutch event that took place in Paris we spoke on topics like Station as intermodal node Station as destination and Station as data center including a debate on the relation between public space and architecture densification and programming of station areas pedestrian flows management and the integration of data Following the Paris workshop the summer school Integrated Mobility Challenges in Future Metropolitan Areas was organised by AMS Institute and Delft University of Technology DIMI with the collaboration of the ARENA architectural research network University of Paris Est and the City of Amsterdam This 8 day workshop extended the debate among international young professionals academics and master students by looking at an important rail metro node in the metropolitan area of the city Amsterdam Sloterdijk Station a crucial hub in a bigger urban area for mobility and exchange and for urban growth The main question was which approaches and scenarios can be tested and applied to these intermodal nodes particularly when dealing with lack of space and growing number of users The results were four very different plans to improve the Sloterdijk Station area and to make the station a future proof intermodal hub In this publication invited experts from practice and knowledge institutes in France and the Netherlands share their common experience and draw on specific aspects and problems of conception management and development of stations A brief overview of the results of the two initiatives Stations of the Future and the summer school Integrated Mobility Challenges in Future Metropolitan Areas is here illustrated accompanied by photo reportages of both events and by a curated reportage of the Amsterdam Sloterdijk station area

The Urbanism of Frank Lloyd Wright Neil Levine, 2016 This is the first book devoted to Frank Lloyd Wright's designs for remaking the modern city Stunningly comprehensive The Urbanism of Frank Lloyd Wright presents a radically new interpretation of the architect's work and offers new and important perspectives on the history of modernism Neil Levine places Wright's projects produced over more than fifty years within their historical cultural and physical contexts while relating them to the theory and practice of urbanism as it evolved over the twentieth century Levine overturns the conventional view of Wright as an architect who deplored the city and whose urban vision was limited to a utopian plan for a network of agrarian communities he called Broadacre City Rather Levine

reveals Wright's larger more varied interesting and complex urbanism demonstrated across the span of his lengthy career. Beginning with Wright's plans from the late 1890s through the early 1910s for reforming residential urban neighborhoods mainly in Chicago and continuing through projects from the 1920s through the 1950s for commercial mixed use civic and cultural centers for Chicago Madison Washington Pittsburgh and Baghdad Levine demonstrates Wright's place among the leading contributors to the creation of the modern city. Wright's often spectacular designs are shown to be those of an innovative precursor and creative participant in the world of ideas that shaped the modern metropolis. Lavishly illustrated with drawings plans maps and photographs this book features the first extensive new photography of materials from the Frank Lloyd Wright Foundation Archives. The Urbanism of Frank Lloyd Wright will serve as one of the most important books on the architect for years to come. *Dierschap* Glenn Delière, Sylvie Van Damme, 2021-02-11

Dierschap is een inspirerend reflectieboek voor iedereen die op professionele basis bezig is met de planning het ontwerp de aanleg of het onderhoud van stedelijke ruimtes. Dieren spelen immers niet alleen een centrale rol in het leveren van allerlei ecosysteemdiensten ze brengen ook kleur in de stad. Vaak bestaat er wel interesse bij stadsplanners ontwerpers en beheerders om iets te doen voor stedelijke fauna maar blijkt er in de praktijk toch veel aarzeling te bestaan. Hoe begin je eigenlijk aan het incorporeren van dieren in de planning het ontwerp of beheer? Dit boek wil reflectie rond het onderwerp stimuleren en een aantal handvatten aanreiken. Met twee filosofische reflecties over de plaats van dieren in de stad en tien inspirerende verhalen vanuit het beleid het ontwerp en de beheerpraktijk wil het boek het doelpubliek vooral over de streep trekken om weloverwogen aan de slag te gaan voor en met dieren in de stad. **The European City** European Association for Architectural Education. Conference, 2004

Het winkellandschap van Amsterdam Clé Lesger, 2013. Overhangende luifels uithangborden uitstallingen op de stoep en sobere interieurs waren ooit typerend voor de winkels in Amsterdam. Vanaf het midden van de zestiende eeuw hebben de puizen etalages en interieurs van de winkels echter grote veranderingen ondergaan. Cl Lesger beschrijft deze in samenhang met ontwikkelingen in bouwkunde en architectuur de opkomst van warenhuizen en supermarkten en veranderingen in verlichting en glasfabricage. Ook de samenstelling koopkracht en smaak van het winkelend publiek spelen een rol. De vele afbeeldingen maken de veranderingen zichtbaar. Daarnaast besteedt Lesger veel aandacht aan de locatie van winkels. Winkels zijn niet willekeurig verdeeld over de stad maar verbonden met de structuur van het stratennetwerk die is ontstaan tijdens stadsuitbreidingen en andere grote ingrepen in het stedelijk landschap. Pas toen er winkelcentra werden gebouwd in buitenwijken werd het patroon van winkelstraten doorbroken. In de vooroorlogse delen van Amsterdam is het oude bewinkelingspatroon wel blijven bestaan. *Architectuur en stedenbouw in Rotterdam, 1850-1940* Jan de Graaf, 1992
