Mac Troubleshooting (Macworld Superguides) , Macs run smoothly most of the time. This book will prepare you for the rare occasions when yours doesn't. Whether you're using an iMac, MacBook, or MacBook Air, our Superguide is filled with solutions for many of the common problems that you might run into. In the United States, when you're in real trouble, you have but one number to call: 911. Back in 2000, while we were racking our brains for a title for Macworld's tips and troubleshooting column, we invoked this emergency calling code, preceding it with Mac, so that its humble author wouldn't be additionally inundated with requests for help with small appliances and domestic disputes. Thus, Mac 911 became the primary place to go within Macworld's pages for help with all things Apple. We've distilled the Mac troubleshooting knowledge we've acquired over the past 10 years of putting together columns and created the Mac Troubleshooting Superguide, the latest in Macworld's popular Superguide series. Since the Mac 911 column's birth, we've seen the death of OS 9 and the rebirth of OS X, the coming and going of countless Mac models, and the explosion of the Internet. We've also witnessed the metamorphosis of Apple, the computer company, into Apple, the media and

telecommunications giant responsible for two of the most game changing products of the young century the iPod and iPhone Yet through all these changes one constant remains the desktops and laptops that we increasingly rely on for our work and pleasure sometimes act up in frustrating ways Fortunately as exasperating as these hiccups may be they are often predictable In this guide we attempt to present the difficulties you might encounter in the order in which you re likely to encounter them If for example something goes amiss as you re installing the latest greatest version of OS X you can be assured that you ll find it in the first chapter Installation If later in the day you press your Mac s power button and nothing good results you ll find help in the next chapter which addresses start up issues crashes and freezes Have a problem with hardware next Simply page on to Hardware Help And so on through the System Issues Fixes OS X s Applications the Internet Networking and Mac Maintenance chapters And if despite all of your diligent efforts no solution is found there are directions for what to do next in the Support Tricks chapter But allow me to also extend a personal invitation to Macworld s Mac 911 forum where I and other knowledgeable Mac users are eager to lend a helping hand
