ICT SCHEME OF WORK

ICT Transition Unit PoS: KS 2 1a 1b 2a 3b 4a 4b 4c 5a 5b 5c	Yr 6: ICT Transition Unit Looking Back, Looking Ahead	Class: Date:

Theme:
This unit aims to offer a measure of continuity and progression in ICT through the important transitional phase between KS2 and KS3. It provides pupils with an opportunity to display their knowledge and understanding with regard to some aspects of the strands of ICT capability contained within National Curriculum requirements, and as fleshed out through the QCA Scheme of Work for ICT. This is a unit in which pupils will produce a Multimedia presentation based on key features and memories of their primary experiences. It will also incorporate an element of finding and selecting web-based information on the receiving school, to be included in the presentation. A copy of the pupil's presentation should be forwarded as stored media to the receiving secondary school in order to provide useful information and assessment material.

Where the unit fits in:
This is a stand-alone unit to be taught leading up to transition to Year 7. It assumes that the Key Stage 2 programme of study for ICT has been covered in full. It will provide pupils with the opportunity to revise and consolidate elements contained within the strands of ICT capability as outlined in the National Curriculum. It will also give pupils a chance to reflect not only on their primary experiences but also their progress in ICT. The unit will provide a context in which pupils can think ahead to new experiences both socially and with regard to extending their knowledge, skills and understanding in ICT.

Vocabulary:
Developing ideas and making things happen:
Year 6: cell, column, out, data, drag, formula, graph, label, model, paste
Year 7: address, cell reference, value, variable
Exchanging and sharing information:
Year 6: audience, bullet point, draft, image, plan, presentation, purpose, digital camera, scanner
Year 7: log on, network, shared area, graphic, copyright

Expectations
Based on the National Curriculum level descriptors for ICT

At the end of this unit:

Most children will: be able to use ICT to present information in different forms, showing awareness of the intended audience and the need for quality in their presentations. They will be able to compare their use of ICT with other methods and with its use outside school (Level 4)

Some children will not have made so much progress and will: use ICT to generate, develop, organise and present their work. They will be able to describe their use of ICT and its use outside school (Level 3)

Some children will have progressed further and will: use ICT to structure, refine and present information in different forms and styles for a specific purpose and audience. They will be able to discuss their knowledge and experience of using ICT and their observations of its use outside school. They will be able to assess their use of ICT in their work and reflect critically in order to make improvements in subsequent work. (Level 5)

  The National Conference 2014 Nigeria. National Conference,2014 **Teaching with Tablets** Helen Caldwell,James Bird,2015-03-19 The presence of handheld technologies in the classroom isn t enough you need to know how to use them to enhance teaching and transform learning As more and more primary schools acquire devices such as iPads and tablets it is becoming clear that adding them as a classroom resource is not enough Teachers and trainees need strategies to integrate these into existing learning contexts in a meaningful way Without this these fantastic resources lose their value This book helps teachers to make the most of these devices in the primary classroom It offers guidance on how to use tablets to devise meaningful learning activities embed them in genuine curriculum contexts drawing upon case studies from existing practice It is written for non specialists and explains technical terms in an accessible practical way Each chapter begins with a case study contributed by a teacher using tablets in schools Real life examples and comments like this give the text a truly practical focus The book s Pinterest board includes the apps mentioned in the book as well as a handy infographic for a snapshot guide on starting off your tablet teaching journey A note from the authors The use of technology in schools continues to evolve rapidly as new devices and tools become available and the adoption of mobile devices such as iPads and tablets has been a particularly exciting development in recent years The benefits offered by these technologies such as their portability connectivity accessibility and range of media present new challenges and opportunities for teaching and learning As the take up of tablets gathers pace in our schools there is a need for advice on the best approaches and apps to help achieve successful learning outcomes Teachers need to find meaningful ways to integrate the devices into their own practice and to evaluate which of the many thousands of educational apps might be appropriate for their pupils This book considers how iPads and tablets can be used to enhance teaching and learning in primary schools It is especially relevant in the light of the computing curriculum which puts a new emphasis on children as makers and creators of digital content Across other curriculum subjects too the introduction of mobile devices that can be quickly and reliably accessed has precipitated a shift in practice For example they have enabled teachers and children to spontaneously pursue lines of inquiry to connect collaborate and publish in many different ways and to use their digital skills to enhance their exploration of the physical world outside the classroom With these opportunities in mind we offer anecdotes from the classroom and examples of how tablets might be embedded within current pedagogy and practice as a natural learning tool Each chapter combines a

practical case study with discussion of related pedagogy and recommends apps to support a personalised inclusive and active approach to teaching and learning **Security, Privacy, and Applied Cryptography Engineering** Claude Carlet,M.
