NO. 4 IDEAL LOADING TOOL

PRICE ~~\$6.00~~

\$8.00

Care should always be taken after firing to decap the shells and clean them in strong boiling soap suds or soda water. See that all the burned powder is removed and the shells dried quickly or they will soon be destroyed by corrosion.

To Remove the Old Primer—Place the extractor plug in the loading chamber D with the pin up; put the shell over it; bring the handles together and press the shell gently on the pin until the primer is expelled.

To Seat the Primer—Be sure the shell is empty. Never attempt to seat the primer after you have the powder in. Enter the primers well in the pocket of the shell by placing them on the loading table wrong side up, forcing the pocket of the shell down on the primer, then place the shell in the hole, C; bring the levers together and the punch will force the primer home. Be sure it is below the surface of the head, or it may interfere with the action of the arm and cause premature explosion.

To Load—See that the grooves in the bullet are filled with a good lubricant—Ideal Bullet Lubricant is the best. Dip the bullets in melted lubricant, base downward, covering the grooves; then force them through the sizing die, point first. See that the punch, E, rests in the center of the ball. Open the mouth of the shell slightly, by forcing in the taper point, A. Put in a charge cup full of black powder, enter the bullet in the shell by hand, place the cartridge in the loading chamber, D, bring the handles together, and firmly press the cartridge to the head; then open to withdraw the cartridge, which is now ready for use. Each of these tools is made to crimp the cartridge. If you do not wish a crimp, do not close the handles to the limit when seating the bullet.

In Casting Bullets—Be sure the mould is hot, also the lead, or you cannot get good results. Do not be discouraged if the first few bullets are not good ones. A mould heated by the process of running bullets works the best.

N. B.—Always put the tool away clean. Keep the loading chamber and dies greased inside to prevent rust. Ideal Dipper, Lead Pot, and Cover will help you in moulding your bullets.
