Ideas For Action Relevant Theory For Radical Change:

Ideas for Action Cynthia Kaufman, 2003 From the Enron scandal to global warming from the war on terrorism to the war on drugs a growing number of people are unhappy with the status quo Yet those genuinely interested in reading about the issues find that few contemporary theorists are seriously committed to accessible clear writing Furthermore the mainstream media rarely represents social movements and the theories associated with them without distortion or bias Written in an engaging and accessible style *Ideas for Action* gives activists the intellectual tools to turn discontent into a plan of action Exploring a wide range of political traditions including Marxism anarchism anti imperialism poststructuralism feminism critical race theory and environmentalism Cynthia Kaufman acknowledges the strengths and weaknesses of a variety of political movements and the ideologies inspired by or generated through them Kaufman incorporates elements of her own activist experiences and offers a coherent analysis without pretending to offer the final word on complex issues Instead she encourages inquiry and further investigation offering readers the information to orient a critical understanding of the social world and a glimpse of the excitement and rewards of serious intellectual engagement with political ideas *Ideas for Action* examines the work of diverse thinkers such as Adam Smith Paulo Freire Stuart Hall and Ronald Takaki Kaufman's insights break the chains of cynicism and lay a foundation for more effective organizing Cynthia Kaufman lives in Oakland CA where she has been involved in the tenant's rights movement She has a doctorate in Philosophy from the University of Massachusetts at Amherst and teaches Philosophy and Women's Studies at De Anza College in Cupertino

Identity and Capitalism Marie Moran, 2014-11-13 This is a splendid book that dispels myths about identity and presents a cultural materialist case for the study of such keywords and their preoccupations under the hegemony of neoliberal capitalism Professor Jim McGuigan Loughborough University *Identity* particularly as it is elaborated in the associated categories of personal and social identity is a relatively novel concept in western thought politics and culture The explosion of interest in the notion of identity across popular political and academic domains of practice since the 1960s does not represent the simple popularisation of an older term as is widely assumed but rather the invention of an idea *Identity and Capitalism* explores the emergence and evolution of the idea of identity in the cultural political and social contexts of contemporary capitalist societies Against the common

supposition that identity always mattered this book shows that what we now think of routinely as personal identity actually only emerged with the explosion of consumption in the late twentieth century It also makes the case that what we now think of as different social and political identities only came to be framed as such with the emergence of identity politics and new social movements in the political landscapes of capitalist societies in the 60s and 70s Marie Moran provides an important new exploration of the articulation of the idea of identity to the social logic of capitalism from the organised capitalism of the mid twentieth century up to and including the neoliberal capitalism that prevails today Drawing on the work of Raymond Williams the cultural materialist approach developed here provides an original means of addressing the political debates about the value of identity in contemporary capitalist societies

We Want Freedom Mumia Abu-Jamal, 2004

In his youth Mumia Abu Jamal helped found the Philadelphia branch of the Black Panther Party wrote for the national newspaper and began his life long work of exposing the violence of the state as it manifests in entrenched poverty endemic racism and unending police brutality and celebrating a people's unending quest for freedom In *We Want Freedom* Mumia combines personal experience with extensive research to provide a compelling history of the Black Panther Party what it was where it came from and what rose from its ashes Mumia also pays special attention to the U S government's disruption of the organization through COINTELPRO and similar operations While Abu Jamal is a prolific writer and probably the world's most famous political prisoner this book is unlike any of Mumia's previous works In *We Want Freedom* Abu Jamal applies his sharp critical faculties to an examination of one of the U S's most revolutionary and most misrepresented groups A subject previously explored by various historians and forever ripe for insider accounts the Black Panther Party has not yet been addressed by a writer with the well earned international acclaim of Abu Jamal nor with his unique combination of a powerful even poetic voice and an unsparing critical gaze Abu Jamal is able to make his own Black Panther Party days come alive as well as help situate the organization within its historical context a context that included both great revolutionary fervor and hope and great repression In this era when the US PATRIOT Act dismantles some of the same rights and freedoms violated by the FBI in their attack on the Black Panther Party the story of how the Party grew and matured while combating such invasions is a welcome and essential lesson

Masculinities in Higher Education Jason A. Laker, Tracy Davis, 2011-07-15

Masculinities in Higher Education provides empirical evidence theoretical support and developmental interventions for educators working with college men both in and out of the classroom The critical philosophical perspective of the text challenges the status quo and offers theoretically sound educational strategies to successfully promote men s learning and development Contesting dominant discourses about men and masculinities and binary notions of privilege and oppression the contributors examine the development and identity of men in higher education today This edited collection analyzes the nuances of lived identities intersections between identities ways in which individuals participate in co constructing identities and in turn how these identities influence culture Masculinities in Higher Education is a unique resource for graduate students and professional post secondary educators looking for strategies to effectively promote college men s learning and development Z Magazine ,2003 **Educating for Action** Jason Del Gandio,Anthony Nocella II,2014-09-09 An inspiring instructional handbook for transforming idealism into social change Handbook of Feminist Research Sharlene Nagy Hesse-Biber,2012 The second edition of the Handbook of Feminist Research Theory and Praxis presents both a theoretical and practical approach to conducting social science research on for and about women The Handbook enables readers to develop an understanding of feminist research by introducing a range of feminist epistemologies methodologies and methods that have had a significant impact on feminist research practice and women s studies scholarship The Handbook continues to provide a set of clearly defined research concepts that are devoid of as much technical language as possible It continues to engage readers with cutting edge debates in the field as well as the practical applications and issues for those whose research affects social policy and social change It also expands on the wealth of interdisciplinary understanding of feminist research praxis that is grounded in a tight link between epistemology methodology and method The second edition of this Handbook will provide researchers with the tools for excavating subjugated knowledge on women s lives and the lives of other marginalized groups with the goals of empowerment and social change *Participatory Action Research* Hal A. Lawson,James Caringi,Loretta Pyles,Janine Jurkowski,Christine Bozlak,2015-01-06 As novel complex social problems increase especially those involving vulnerable people who reside in challenging places the limitations of conventional research methods implemented by just one or two investigators become apparent Research and development alternatives are needed particularly methods that engage teams of researchers in real world problem solving while simultaneously generating practice and policy relevant knowledge Research methods that effectively tap the expertise of everyday people especially those impacted by these targeted social problems are a special priority because academic researchers often lack experiential knowledge that stems from direct everyday encounters with these vexing problems Participatory action research PAR responds to these manifest needs It provides a methodological structure and operational guidelines for preparing and deploying people from various walks of life as co researchers and it provides a proven strategy for generating practice and policy relevant knowledge as problem solving in real world contexts proceeds Rewriting the Victim Erin M.

Kamler,2019-02-26 The international movement against the trafficking of women which has gained momentum over the past two decades is driven largely by the United States in tandem with state governments and NGO workers Feminist organizations have played a key role in carrying out anti trafficking policies but are increasingly divided over what those policies should look like The primary divide exists between those feminists who want to abolish prostitution as a key link to trafficking and those who argue that what sex workers need is not to have their livelihoods taken away through paternalistic policies but improved working conditions to alleviate the dangers associated with their work A primary criticism of US NGO workers well intentioned as they may be is that they misunderstand the cultural and economic conditions of the women they purport to help This book provides a unique response to this misunderstanding On one level it shows how this movement is in fact based on a Western mindset that problematizes women and puts its own interests before those of the women it is trying to help But the project s primary innovation is in the method that it develops to explore the conflict of cultural values that gives rise to the aforementioned debates what Erin M Kamler calls Dramatization as Research DAR Through writing and producing Land of Smiles a musical inspired by field research that includes over fifty interviews with female migrant laborers sex workers activists NGO employees and other members of the anti trafficking movement Kamler presents one of the dominant stories about human trafficking and critiques the discourse about the trafficking of women in Thailand The book examines how the musical aimed to facilitate communication between stakeholders in the anti trafficking movement in Thailand and prime a dialogue to explore the policies practices and outcomes of actions in this environment Through researching writing and producing the musical for the individuals on whose experiences the story of the musical is based Kamler shows how the arts can be used as a feminist communication intervention and a vehicle for understanding the cultural dimension of human rights

Strategic Action for Animals Melanie Joy,2008 **Anarchy in Athens** Nicholas Apoifis,2016-11-11 The battles between Athenian anarchists and the Greek state have received a high degree of media attention recently But away from the intensity of street protests militants implement anarchist practices whose outcomes are far less visible They feed the hungry and poor protect migrants from fascist beatings and try to carve out an autonomous political social and cultural space Activists within the movement share politics centred on hostility to the capitalist state and all forms of domination hierarchy and discrimination Based on extensive ethnographic fieldwork among Athenian anarchists and anti authoritarians Anarchy in Athens unravels the internal complexities within this milieu and provides a better understanding of the forces that give the space its shape

Rhetoric for Radicals Jason Del Gandio,2008-11-01 Rhetoric for Radicals is intended for college aged activists and organizers and for the most part it s written in a relaxed approachable style It does get a bit cerebral and academic in places in demonstrating how the book builds on the previous literature but this material is kept to a minimum On the whole Rhetoric for Radicals is an invaluable comprehensive how to book that will greatly benefit beginning and seasoned rhetors alike Rhetoric for Radicals concludes on a hopeful note with the wish that its

activist readership will internalize the book's rhetorical tools and tactics and will be that much better equipped to become the rhetors of the past who created the future And indeed there can be but little doubt that this thorough well organized accessible and even personal little handbook is the best instrument imaginable for fulfilling this purpose Frank Kaminski
