Arabic in the Fray Yasir Suleiman, 2013-07-22 The pre modern period saw a background of inter ethnic strife among Arabs and non Arabs mainly Persians Starting from the symbolic and cognitive roles of language Yasir Suleiman shows how discussions about the inimitability and untranslatability of the Qur'an in this period were at some deep level concerned with issues of ethnic election In this respect theology and ethnicity emerge as partners in theorising language Staying within the symbolic role of language Suleiman goes on to investigate the role of paratexts and literary production in disseminating language ideologies and in cultural contestation He shows how language symbolism is relevant to ideological debates about hybrid and cross national literary production in the Arab milieu In fact language ideology appears to be everywhere and a whole chapter is devoted to discussions of the cognitive role of language in linking thought to reality

Ideology, Agency, and Intercultural Communicative Competence Jeremie Bouchard, 2017-03-30 Associated with an important epistemological shift from language proficiency to language criticality in applied linguistic research this book provides a sociological perspective on foreign language education in Japan By employing ethnographic methods to investigate the relationship between three core analytical elements foreign language education geared towards the development of learners intercultural communicative competence nihonjinron and native speakerism as potentially constraining ideological forces and EFL practices observed at four Japanese junior high schools the author not only shares valuable insights into how English is taught and learned in a stratum of the Japanese EFL system which has received limited attention from researchers over the years but also clarifies the fundamental and complex changes currently taking place in the Japanese EFL landscape This multi faceted book also calls for greater consideration in postmodern ideology critique for the stratified nature of social processes as well as the material conditions and underlying generative mechanisms involved in the production and consumption of including resistance to ideological discourse Accordingly it outlines several challenges shaping ideology research in educational settings and responds by developing a realist oriented theoretical and methodological approach to address these challenges This book serves as a unique point of reference for the study of parallel nationalist discourses embedded in foreign language education systems around the world

The Language of Adult Immigrants Elizabeth R. Miller, 2014-06-04 This book is the first to explore the constitution of language learner agency by drawing on performativity theory an approach that remains on the periphery of second language research Though many scholars have drawn on poststructuralism to theorize learner identity in non essentialist terms most have treated agency as an essential feature that belongs to or inheres in individuals By contrast this work promotes a view of learner agency as

inherently social and as performatively constituted in discursive practice In developing a performativity approach to learner agency it builds on the work of Vygotsky and Bakhtin along with research on agency of spaces and language ideologies Through the study of discourses produced in interviews this work explores how immigrant small business owners co construct their theories of agency in relation to language learning and use The analysis focuses on three discursive constructs produced in the interview talk subject predicate constructs evaluative stance and reported speech and investigates their discursive effects in mobilizing ideologically normative performatively realized agentive selves The International Encyclopedia of Language and Social Interaction, 3 Volume Set Cornelia Ilie, Todd Sandel, 2015-06-08 The International Encyclopedia of Language and Social Interaction is an invaluable reference work featuring contributions from leading global scholars available both online and as a three volume print set The definitive international reference work on a topic of major and increasing importance in a new series of sub disciplinary international encyclopedias Provides state of the art research for scholars in a highly interactive and accessible format available both online and as a three volume print set Covers key research topics in the field with contributions from a team of experienced global editors Successfully brings into a single source explication of all of the fascinating and ground breaking Language and Social Interaction work developing globally and across subjects Part of The Wiley Blackwell ICA International Encyclopedias of Communication series published in conjunction with the International Communication Association Online version available at www.wileyicaencyclopedia.com

Pragmaticizing Understanding Michael Meeuwis, Jan-Ola Östman, 2012-05-01 The ideas that mark modern day pragmatics are old but did not start to get more systematically developed until the 1960s and 1970s Still the very recognition of pragmatics as a self standing academic discipline is a product of the 1980s not least made possible by the establishment of the International Pragmatics Association One scholar in particular has devoted his life both to IPrA and to the discipline This volume pays homage to Jef Verschueren on the occasion of his 60th birthday It celebrates him for his long standing dedication as Secretary General of IPrA and for his scholarly contributions to the field We owe to Jef Verschueren the insight that the processes through which language users do or do not achieve understanding among each other in communication can only be fully comprehended if approached from a pragmatic perspective i e if understanding is pragmaticized The chapters in this book are written by scholars who like Jef Verschueren have played a key role in the genesis and development of the field and who still actively contribute to its advancement today Each author looks back evaluates the present and takes on new challenges Contrastive Media Analysis Stefan Hauser, Martin Luginbuhl, Martin Luginbühl, 2012 Contrastive media analysis is a vast field of academic research that metaphorically speaking comes in many shapes and sizes and therefore is confronted by manifold theoretical and methodological challenges This contribution focuses on two interrelated aspects a the problem of equivalence as a prerequisite of comparison and b the comparative constellation and its effects on the interpretation of cultural variance It is important to mention that the discussion in this paper is set against the backdrop

of a genre based approach Starting from the initially rather unspectacular observ English in the Nordic Countries Elizabeth Peterson, Kristy Beers Fägersten, 2023-11-15 People in the Nordic states Norway Sweden Finland Denmark and Iceland rank as among the most proficient speakers of English in the world In this unique volume international experts explore how this came to be what English usage and integration looks like in different spheres of society and the economy in these countries and the implications of this linguistic phenomenon for language attitudes and identity for the region at large and for English in Europe and around the world Led by Elizabeth Peterson and Kristy Beers Fägersten contributors provide a historical overview to the subject synthesize the latest research illustrate the roles of English with original case studies from diverse communities and everyday settings and offer transnational insights critically and in conversation with the situation in other Nordic states This comprehensive text is the first book of its kind and will be of interest to advanced students and researchers of World Global Englishes and English as a lingua franca language contact and dialect studies language varieties language policy multilingualism sociolinguistics and Nordic Scandinavian and European studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license *The Routledge Handbook of Linguistic Anthropology* Nancy Bonvillian, 2015-08-11 The Routledge Handbook of Linguistic Anthropology is a broad survey of linguistic anthropology featuring contributions from prominent scholars in the field Each chapter presents a brief historical summary of research in the field and discusses topics and issues of current concern to people doing research in linguistic anthropology The handbook is organized into four parts Language and Cultural Productions Language Ideologies and Practices of Learning Language and the Communication of Identities and Language and Local Global Power and covers current topics of interest at the intersection of the two fields while also contextualizing them within discussions of fieldwork practice Featuring 30 contributions from leading scholars in the field The Routledge Handbook of Linguistic Anthropology is an essential overview for students and researchers interested in understanding core concepts and key issues in linguistic anthropology
