If China Attacks Taiwan Military Strategy Politics And Economics Asian Security Studies:

If China Attacks Taiwan Steve Tsang, 2010-04-05 This is a new analysis of the key issues facing Chinese policy makers in their approach towards Taiwan This is one of the most tense and potentially explosive relationships in world politics This book explains succinctly the impetus the methods and the consequences if China is to use force a prospect that has become greater following the return of President Chen Shui bian to power in Taiwan for a second term in 2004 If China Attacks Taiwan shows how in reality there can be no real winner in such an eventuality and how the consequences would be dire not just for Taiwan and China but East Asia as a whole Whether China will use force depends ultimately on how its policy making apparatus assess potential US intervention whether its armed forces can subdue Taiwan and counter US military involvement as well as on its assessment of the likely consequences Given the extremely high probability of American involvement this volume appeals to not only scholars and students working on China its foreign policy and the security and prosperity of East Asia but also to policy makers and journalists interested in China s rise and its defense policy Taiwan s security and development regional stability as well as US policy toward China and the East Asia region generally This book is essential for understanding China s efforts to achieve a peaceful rise which requires it to transform itself into a global power not by the actual use of force but by diplomacy backed up by rapidly expanding military power This book is an excellent resource for all students and scholars of military and security studies Asian China Taiwan studies and international relations **Political**

US-China Rivalry Brian C. H. Fong, 2024-11-30 US China Rivalry offers a holistic analysis of the unfolding of US China competition in the Indo Pacific using a novel theory called neo offensive realism It synthesises quantitative and qualitative data to examine the intensification of US China competition across the Indo Pacific in recent years with a focus on why the competition is intensifying under the interplay of system level and unit level forces where the competition is unfolding across states and quasi states in the region how the competition is conducted through economic and military influence mechanisms and whether the competition is developing in the future

Chinese Strategic Culture and Foreign Policy Decision-Making Huiyun Feng, 2007-06-11 Examining the major academic and policy debates over China's rise and related policy issues this book looks into the motivations and intentions of a rising China Most of the scholarly works on China's rise approach the question at a structural level by looking at the international system and the systemic impact on China's foreign policy Traditional Realist theorists define China as a revisionist power eager to address wrongs done to them in history whilst some cultural and historical analyses attest that China's strategic culture has been offensive despite its weak material capability Huiyun Feng's path breaking contribution to the debate tests these rival

hypotheses by examining systematically the beliefs of contemporary Chinese leaders and their strategic interactions with other states since 1949 when the communist regime came to power The focus is on tracing the historical roots of Chinese strategic culture and its links to the decision making of six key Chinese leaders via their belief systems Chinese Strategic Culture will be of interest to students of Chinese politics foreign policy strategic theory and international relations in general

New Thinking about the Taiwan Issue Jean-Marc F. Blanchard, Dennis V. Hickey, 2012-06-12 The Taiwan question has long been considered one of the most complicated and explosive issues in global politics In recent years however relations between Taiwan and the Chinese mainland have improved substantially to the surprise of many In this ground breaking collection distinguished contributors from the US Asia and Europe seek to go beyond the standard recitation of facts that often characterizes studies focusing on the Beijing Taipei dyad Rather they employ a variety of theories as well as both quantitative and qualitative methodologies to analyze the ebbs and flows of the Taiwan issue Their discussions clearly illuminate why there is a Taiwan Problem why conflict did not escalate to war between 2000 and 2008 and why cross Strait relations improved after 2008 The book further reveals the limits of realism as a device to gain traction into the Taiwan issue demonstrates the importance of taking into account domestic political variables and shows how theory can be used to advance the cause of better China Taiwan relations and to analyze the potential for future conflict over Taiwan New Thinking about the Taiwan Issue is essential reading not only for students scholars and practitioners with an interest in studying relations across the Taiwan Strait but also for any reader interested in economics international relations comparative politics or political theory

Chinese Military Strategy in the Third Indochina War Edward C. O'Dowd, 2007-04-16 This well researched volume examines the Sino Vietnamese hostilities of the late 1970s and 1980s attempting to understand them as strategic operational and tactical events The Sino Vietnamese War was the third Indochina war and contemporary Southeast Asia cannot be properly understood unless we acknowledge that the Vietnamese fought three not two wars to establish their current role in the region The war was not about the Sino Vietnamese border as frequently claimed but about China's support for its Cambodian ally the Khmer Rouge and the book addresses US and ASEAN involvement in the effort to support the regime Although the Chinese completed their troop withdrawal in March 1979 they retained their strategic goal of driving Vietnam out of Cambodia at least until 1988 but it was evident by 1984-85 that the PLA held back by the drag of its Maoist organization doctrine equipment and personnel was not an effective instrument of coercion Chinese Military Strategy in the Third Indochina War will be of great interest to all students of the Third Indochina War Asian political history Chinese security and strategic studies in general

Chinese Civil-Military Relations Nan Li, 2010-04-05 This new book addresses three key issues What has changed in Chinese civil military relations What can account for changes And what are the implications for Chinese security policy and strategic behaviour It tackles these questions by sharply assessing civil military dynamics in elite politics such dynamics in national security and arms control policy relations between commanders and

political commissars relations between the PLA and society civil military dynamics regarding defence economics and logistics and such dynamics regarding dual use technologies and defence industry These analyses build into the central theme that the emphasis of Chinese civil military relations is shifting from politics to military tasks This is an extremely important new development by a nation many predict to become a super power in the twenty first century This is therefore essential reading for all students and scholars of strategic and security studies Chinese studies and international relations

America's Challenge Michael D. Swaine, 2012-05-01 The emergence of the People's Republic of China on the world scene constitutes the most significant event in world politics since the end of World War II As the world's predominant political economic and military power the United States faces a particularly significant challenge in responding to China's rising power and influence especially in Asia Offering a fresh perspective on current and future U S policy toward China Michael Swaine examines the basic interests and beliefs behind U S China relations recent U S and Chinese policy practices in seven key areas and future trends most likely to affect U S policy American leaders he concludes must reexamine certain basic assumptions and approaches regarding America's position in the Western Pacific integrate China policy more effectively into a broader Asian strategy and recalibrate the U S balance between cooperative engagement and deterrence toward Beijing

Conflict Management, Security and Intervention in East Asia ,

The Arms Race in Asia Andrew T.H. Tan, 2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general
