

## OPERATING THE THREE POINT HITCH WITH DRAFT CONTROL

To provide a specific example showing the use of the three-point hitch with position control and draft control, we have selected the moldboard and disk plows.

Set the upper link at the 22-inches (560 mm) length, pin to pin.

Place the draft control lever at the center of its operating range.

Starting at the end of the field, move the position control lever forward to the "lower" position and drive ahead several feet.

Stop the tractor and adjust the upper link either shorter or longer, to level the plow front to rear.

Adjust the lift link turn buckles to level the plow side to side.

After the plow has been leveled, adjust the draft control lever either forward (to go deeper) or rearward (for shallower depth) until the desired depth is reached.

If the drop action of the plow is too fast, rotate the hydraulic flow control knob slowly until the plow reacts at the desired speed. Refer to the hydraulic flow control knob.

When the control levers are set for the field conditions, set the stop so the position control lever is returned to this position each time the plow is lowered into the ground.

When reaching the end of the field, move the position control lever rearward to lift the plow to transport position.

Re-enter the field and lower the plow by moving the position control lever forward to the stop.

The plow will maintain the desired depth as previously set by the draft control lever.

## DRAFT CONTROL LINKAGE

This unit is mounted on the rear side of hydraulic case. The spring attached to the sensor bracket senses the resistance encountered by the plow through the top link and expands or contracts. The expansion or contraction of this spring is transmitted through the sensing rod to the draft link to cause the control rod to adjust the plowing depth, depending on the resistance. The top link can be installed in any one of three different positions to meet the field conditions. The sensing unit is to be locked by the stopper when there is no need for draft control.
