Photorealistic Rendering Techniques Georgios Sakas, Peter Shirley, Stefan Müller, 2012-12-06 This book contains the final versions of the proceedings of the fifth EUROGRA PHICS Workshop on Rendering held in Darmstadt Germany between 13-15 June 1994. With around 80 participants and 30 papers, the event continued the successful tradition of the previous ones, establishing the event as the most important meeting for persons working on this area worldwide. After more than 20 years of research, rendering remains a partially unsolved, interesting and challenging topic. This year 71 papers have been submitted from Europe, North America, and Asia. The average quality in terms of technical merit was impressive, showing that substantial work is achieved on this topic from several groups around the world. In general, we all gained the impression that in the meantime the technical quality of the contributions is comparable to that of a specialised high-end full-scale conference. All papers have been reviewed from at least three members of the program committee. In addition, several colleagues helped us in managing the reviewing process in time, either by supporting additional reviews or by assisting the members of the committee. We have been very happy to welcome eminent invited speakers. Holly Rushmeier is internationally well known for her excellent work in all areas of rendering and gave us a review of modelling and rendering participating media with emphasis on scientific visualization. In addition, Peter Shirley presented a survey about future trends in rendering techniques.
