Exceptionality in East Asia Shane N. Phillipson, Heidrun Stoecker, Albert Ziegler, 2013-01-04 The continual successes of students from East Asia are confirmed in a variety of international tests of academic achievement and yet

despite this attainment many scholars have realised that a substantial proportion of these students are also underachieving Using the actiotope model of giftedness to integrate a broad range of research this innovative book features a number of chapters written by internationally recognised scholars in a frank and lively discussion about the origins of exceptionality in students from East Asia With the actiotope model as the theoretical framework the book distinguishes between trait models of giftedness and systems approaches to exceptionality Breaking new ground in understanding the complex interactions between a learner s environment goals intelligence and motivations in the development of their ever expanding knowledge and skill set this book will describe with examples a systems approach to the development of exceptionality allowing educators and researchers the ability to track students with greater precision influence the means by which educators identify and support students with the potential for exceptional performance suggest possible reasons for the variability in the achievement of potentially gifted students provide strategies to support these students have a profound effect on the way that exceptionality and giftedness are defined and understood not only in East Asia but also in the West Covering issues that have firm theoretical foundations and which are based on cutting edge ideas Exceptionality in East Asia has significant implications for gifted education and is essential reading for scholars undergraduate and postgraduate students interested in the psychological and social basis of exceptionality

Teaching Motivation for Student Engagement Debra K.

Meyer,Alyssa Emery,2021-03-01 Helping teachers understand and apply theory and research is one of the most challenging tasks of teacher preparation and professional development As they learn about motivation and engagement teachers need conceptually rich yet easy to use frameworks At the same time teachers must understand that student engagement is not separate from development instructional decision making classroom management student relationships and assessment This volume on teaching teachers about motivation addresses these challenges The authors share multiple approaches and frameworks to cut through the growing complexity and variety of motivational theories and tie theory and research to real world experiences that teachers are likely to encounter in their courses and classroom experiences Additionally each chapter is summarized with key take away practices A shared perspective across all the chapters in this volume on teaching teachers about motivation is walking the talk In every chapter readers will be provided with rich examples of how research on and principles of classroom motivation can be re conceptualized through a variety of college teaching strategies Teachers and future teachers learning about motivation need to experience explicit modeling practice and constructive feedback in their college courses and professional development in order to incorporate those into their own practice In addition a core assumption throughout this volume is the importance of understanding the situated nature of motivation and avoiding a one size fits all approach in the classroom Teachers need to fully interrogate their instructional practices not only in terms of motivational principles but also for their cultural relevance equity and developmental appropriateness Just like P 12 students college students bring their histories as learners and beliefs about motivation to their formal study of motivation That is why

college instructors teaching motivation must begin by helping students evaluate their personal beliefs and experiences. Relatedly, college instructors need to know their students and model differentiating their interactions to support each of them. The authors in this volume have collectively decades of experience teaching at the college level and conducting research in motivation and provide readers with a variety of strategies to help teachers and future teachers explore how motivation is supported and undermined. In each chapter in this volume, readers will learn how college instructors can demonstrate what effective motivationally supportive classrooms look sound and feel like.

Motivation Science
 Mimi Bong, Johnmarshall Reeve, Sung-il Kim, 2023 Motivational science has advanced tremendously in the last decade. However, it is now clear that future progress is going to be stalled by the extent of disagreement among motivation scientists to some basic yet controversial questions. To help move motivation science toward greater coherence, we decided to recruit prominent scholars to voice their contrasting perspectives. Such debate is not only interesting but it also makes future research discoveries, collaborations, and applications more fruitful. It is in this spirit that we put together a volume to address those controversies that are most likely to provide insight.

Advances in Motivation Science, 2025-06-16 Advances in Motivation Science Volume Twelve, the latest release in the Motivation Science series, contains interesting articles that cover topics such as Advances and Challenges in Work Motivation, A Whole Person Perspective Integrating Two Separate Research Traditions, The Conscientiousness Interest Compensation CONIC Model, The Drive to Escape: Uncovering the Motivational Dynamics of Suicide-Related Cognitive Accessibility in Everyday Life, and Cue-Based Behavior. A Pavlovian Instrumental Transfer Approach to Automatic Goal Pursuit. Presents new research in the field of motivation science and research.
