

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light. These rays, labeled 'Incoming solar radiation', travel downwards towards a blue and green globe labeled 'Earth'. On the left side of the globe, some rays are shown being reflected away, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. On the right side, more rays hit the surface, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. From the right side of the globe, rays are shown being emitted outwards, labeled 'Some heat passes out into Space'. On the far right, a text block explains that 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth'.

Sun

Incoming solar radiation

Some heat passes  
out into Space

Reflection

(some of the incoming  
radiation is reflected  
by Earth's surface and  
the atmosphere back
